CAPSTONE TURBINE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Business and Organization

Capstone Turbine Corporation (the “Company”) develops, manufactures, markets and services microturbine technology solutions for use in stationary distributed power generation applications, including cogeneration (combined heat and power (“CHP”), integrated combined heat and power (“ICHP”), and combined cooling, heat and power (“CCHP”)), renewable energy, natural resources, critical power supply, transportation and marine. In addition, the Company’s microturbines can be used as battery charging generators for hybrid electric vehicle applications. The Company was organized in 1988 and has been commercially producing its microturbine generators since 1998.

2. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“generally accepted accounting principles” or “GAAP”) for interim financial information and the instructions to Form 10-Q and Regulation S-X promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). They do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The condensed consolidated balance sheet at March 31, 2017 was derived from audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended March 31, 2017. In the opinion of management, the interim condensed consolidated financial statements include all adjustments (including normal recurring adjustments) necessary for a fair presentation of the financial condition, results of operations and cash flows for such periods. Results of operations for any interim period are not necessarily indicative of results for any other interim period or for the full year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the Fiscal Year 2017. This Quarterly Report on Form 10-Q (this “Form 10-Q”) refers to the Company’s fiscal years ending March 31 as its “Fiscal” years.

Evaluation of Ability to Maintain Current Level of Operations In connection with preparing the consolidated financial statements for the third quarter of Fiscal 2018, management evaluated whether there were conditions and events, considered in the aggregate, that raised substantial doubt about the Company’s ability to meet its obligations as they became due for the next twelve months from the date of issuance of its third quarter of Fiscal 2018 interim condensed consolidated financial statements. Management assessed that there were such conditions and events, including a history of recurring operating losses, negative cash flows from operating activities, the continued impact of the volatility of the global oil and gas markets, a strong U.S. dollar in certain markets making our products more expensive in such markets and ongoing geopolitical tensions in Russia, North Africa and the Middle East. During the third quarter of Fiscal 2018, the Company’s working capital requirements were in-line with management’s expectations, which included the reduction in inventory as a result of a decrease in finished goods and the continued management of the timing of payments of accounts payable. The Company incurred a net loss of \$0.3 million and used cash in operating activities of \$3.3 million for the third quarter of Fiscal 2018. The Company incurred a net loss of \$8.1 million and used cash in operating activities of \$9.2 million for nine months ended December 31, 2017. The Company also had capital expenditures related to the consolidation of its facilities in the third quarter of Fiscal 2018 which contributed to the cash used in investing activities. As of December 31, 2017, the Company had cash, cash equivalents and restricted cash of \$16.5 million, and outstanding borrowings under its credit facility of \$11.0 million.

Management evaluated these conditions in relation to the Company’s ability to meet its obligations as they become due. The Company’s ability to continue current operations and to execute on management’s plans is dependent on its ability to generate cash flows from operations. Management believes that the Company will continue to make progress on its path to profitability by continuing to lower its operating costs and to develop its geographical and vertical markets. The Company may seek to raise funds by selling additional securities (through the at-the-market offering or otherwise) to the public or to selected investors or by obtaining additional debt financing. There is no assurance that the Company will be able to obtain additional funds on commercially favorable terms or at all. If the Company raises additional funds by issuing additional equity or convertible debt securities, the fully diluted ownership percentages of

existing stockholders will be reduced. In addition, any equity or debt securities that the Company would issue may have rights, preferences or privileges senior to those of the holders of its common stock.

On June 2, 2017, the Company, entered into two secured credit facilities (the “Bridge Bank Credit Agreements”) with Western Alliance Bank through its Bridge Bank division (“Bridge Bank”), with credit support provided by the Export-Import Bank of the United States through its working capital guarantee program. Under the terms of the Bridge Bank Credit Agreements, the Company may borrow up to \$12.0 million on a revolving basis depending on, among other factors, the amount of its eligible inventory and accounts receivable. The Bridge Bank Credit Agreements are for a two-year period ending June 2, 2019. See Note 11—Revolving Credit Facility, for discussion of the credit facilities with Bridge Bank.

The Company maintained two Credit and Security Agreements, with Wells Fargo Bank, National Association (“Wells Fargo”), which provided the Company with a credit facility up to \$20.0 million in the aggregate. Upon closing with Bridge Bank, the Company’s existing credit facilities with Wells Fargo, were paid off in full.

Based on the Company’s current operating plan, management anticipates that, given current working capital levels, current financial projections and the ability to borrow under its credit facility with Bridge Bank, the Company will be able to meet its financial obligations as they become due over the next twelve months from the date of issuance of its third quarter of Fiscal 2018 financial statements.

Change in Accounting Treatment During the three months ended June 30, 2017, the Company changed its method of accounting for warrants through the early adoption of Accounting Standards Update No. 2017-11. For purposes of presentation, the Company on a full retrospective basis, adjusted the warrant liability on its consolidated balance sheets, the change in fair value of warrant liability on its consolidated statement of operations and the change in fair value of warrant liability on its consolidated statements of cash flows to reflect this change in accounting for warrants in this report on Form 10-Q. See Note 3—Recently Issued Accounting Standards and Note 10—Fair Value Measurements for discussion with respect to this change in method of accounting for warrants.

Basis for Consolidation The consolidated financial statements include the accounts of the Company, Capstone Turbine International, Inc., its wholly owned subsidiary that was formed in June 2004 and Capstone Turbine Financial Services, LLC, its wholly owned subsidiary that was formed in October 2015, after elimination of inter-company transactions.

3. Recently Issued Accounting Standards

In July 2017, the Financial Accounting Standards Board (“FASB”) issued a two-part Accounting Standards Update (“ASU”) No. 2017-11, I. Accounting for Certain Financial Instruments With Down Round Features and II. Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests With a Scope Exception (“ASU 2017-11”). ASU 2017-11 amends guidance in FASB ASC 260, Earnings Per Share, FASB ASC 480, Distinguishing Liabilities from Equity, and FASB ASC 815, Derivatives and Hedging. The amendments in Part I of ASU 2017-11 change the classification analysis of certain equity-linked financial instruments (or embedded features) with down round features. The amendments in Part II of ASU 2017-11 re-characterize the indefinite deferral of certain provisions of Topic 480 that now are presented as pending content in the Codification, to a scope exception. Those amendments do not have an accounting effect. ASU 2017-11 is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The Company adopted ASU 2017-11 for the three months ended June 30, 2017, and retrospectively applied ASU 2017-11 as required. See Note 10—Fair Value Measurements for further discussion on changes as a result of the adoption of ASU 2017-11.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), (“ASU 2016-02”). The purpose of ASU 2016-02 is to provide financial statement users a better understanding of the amount, timing, and uncertainty of cash flows arising from leases. The adoption of ASU 2016-02 will result in the recognition of a right-of-use asset and a lease liability for most operating leases. New disclosure requirements include qualitative and quantitative information about the amounts recorded in the financial statements. In September 2017, the FASB issued ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842), which provides additional implementation guidance on the previously issued ASU 2016-02 Leases (Topic 842).

ASU 2016-02 requires a lessee to recognize assets and liabilities on the balance sheet for leases with lease terms greater than 12 months. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018. ASU 2016-02 requires a modified retrospective transition by means of a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the guidance is effective with the option to elect certain practical expedients. Early adoption is permitted. The Company is currently evaluating the impact of ASU 2016-02 on its consolidated financial position and results of operations.

Revenue Recognition Related ASUs:

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”). ASU 2014-09 supersedes nearly all existing revenue recognition guidance under GAAP. The standard’s core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services.

In August 2015, the FASB issued FASB ASU No. 2015-14, Revenue from Contracts with Customers: Deferral of the Effective Date (“ASU 2014-09”), which deferred the effective date of ASU 2014-09 by one year. ASU 2014-09 is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, using one of two retrospective application methods. Early application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

In March 2016, the FASB issued FASB ASU No. 2016-08, Revenue from Contracts with Customers: Principal versus Agent Considerations (“ASU 2016-08”). ASU 2016-08 clarifies the implementation guidance on principal versus agent considerations.

In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing (“ASU 2016-10”). ASU 2016-10 clarifies the implementation guidance for identifying performance obligations and determining when to recognize revenue on licensing agreements for intellectual property.

In May 2016, the FASB issued ASU No. 2016-11, Revenue Recognition and Derivatives and Hedging: Rescission of SEC Guidance Because of ASU 2014-09 and ASU 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting (“ASU 2016-11”). ASU 2016-11 rescinds certain Securities and Exchange Commission (“SEC”) staff comments previously made in regard to these ASU’s.

In May 2016, the FASB issued ASU No. 2016-12, Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients (“ASU 2016-12”) that provide guidance on assessing collectability, presentation of sales taxes, noncash consideration, and completed contracts and contract modifications at transition.

In December 2016, the FASB issued ASU 2016-20, Technical Corrections and Improvements to ASU 2014-09. The amendments in ASU 2014-09 affect narrow aspects of the guidance in ASU 2014-09, which is not yet effective. The amendments in ASU 2014-09 address loan guarantee fees, impairment testing of contract costs, provisions for losses on construction-type and production-type contracts, and various disclosures.

In September 2017, the FASB issued ASU 2017-13, “Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842): Amendments to SEC Paragraphs Pursuant to the Staff Announcement at the July 20, 2017 EITF Meeting and Rescission of Prior SEC Staff Announcements and Observer Comments”(“ASU 2017-13”) The amendments in ASU 2017-13 amends the early adoption date option for certain companies related to the adoption of ASU 2014-09 and ASU 2016-02.

The Company is evaluating its existing revenue recognition policies and the impact of ASU 2014-09, ASU 2015-14, ASU 2016-08, ASU 2016-10, ASU 2016-11, ASU 2016-12 and ASU 2016-20, if any, on its financial position and results of operations. The effective date and transition requirements for the amendments are the same as the effective date and transition requirements for ASU 2014-09. The Company will be required to adopt the revenue recognition standard in annual reporting periods beginning after December 15, 2017 (fiscal year ending March 31, 2019) and interim periods within those annual periods. ASU 2014-09 provides for either full retrospective adoption or a modified retrospective adoption by which it is applied only to the most current period presented. The Company has not yet determined which adoption method will be implemented at this time.

The Company is continuing to analyze the impact of the new standard on the Company's revenue contracts, comparing our current accounting policies and practices to the requirements of the new standard. The new standard requires additional detailed disclosures regarding the company's contracts with customers, including disclosure of remaining unsatisfied performance obligations, in the first quarter Fiscal 2019. We are also identifying and implementing changes to the Company's business processes, systems and controls to support adoption of the new standard in Fiscal 2019. While the Company has not yet identified any material changes in the timing of revenue recognition for our various revenues streams, our evaluation is ongoing and not complete.

4. Customer Concentrations and Accounts Receivable

Sales to E-Finity Distributed Generation, LLC ("E-Finity") and Cal Microturbine ("CAL"), two of the Company's domestic distributors, accounted for 29% and 14%, respectively, of revenue for the three months ended December 31, 2017. Sales to BPC Engineering ("BPC"), one of the Company's former Russian distributors, and Horizon Power Systems ("Horizon"), one of the Company's domestic distributors, each accounted for 16% of revenue for the three months ended December 31, 2016. For the nine months ended December 31, 2017, E-Finity and Horizon accounted for 19% and 10% of revenue, respectively. For the nine months ended December 31, 2016, BPC and Horizon, accounted for 12% and 10% of revenue, respectively.

Additionally, E-Finity, and CAL accounted for 42% and 15%, respectively, of net accounts receivable as of December 31, 2017. E-Finity, Dtc Soluciones Inmobiliarias S.A. de C.V. ("DTC"), one of the Company's Mexican distributors and RSP accounted for 29%, 12% and 10%, respectively, of net accounts receivable as of March 31, 2017.

The Company recorded a net bad debt recovery of approximately \$0.7 million and \$0.8 million during the three and nine months ended December 31, 2017, respectively. As of December 31, 2017, the Company collected approximately \$1.8 million from BPC on their accounts receivable allowance of approximately \$8.1 million. The Company recorded net bad debt expense of approximately \$12,000 for the three months ended December 31, 2016. During the nine months ended December 31, 2016, the Company recorded approximately \$1.4 million in net bad debt recovery, which was previously reserved during Fiscal 2015, for cash received primarily from BPC and Electro Mecanique Industries, one of the Company's distributors in the Middle East and Africa.

On October 18, 2017, the Company announced that it had granted Turbine International, LLC ("TI") and its affiliate, MTE Service, the sole distribution rights for Capstone products and services in the Russian oil and gas sector in exchange for approximately \$6.3 million in cash. In connection with the appointment of TI as the Company's distributor in the Russian oil and gas sector, on October 13, 2017, the Company and TI entered into an Accounts Receivable Assignment Agreement (the "Accounts Receivable Agreement") and Promissory Note (the "Promissory Note"). Pursuant to the terms of the Accounts Receivable Agreement, the Company assigned to TI its right, title and interest to receivables owed to the Company from BPC. As consideration for the assignment of the BPC receivable, TI agreed to pay the Company \$2.5 million in three payments by February 1, 2018. Under the terms of the Promissory Note, TI agreed to pay the Company \$3.8 million to be paid over a three-year period in 35 equal monthly installments starting in August 2018. On October 13, 2017, the Company and Hispania Petroleum, S.A. (the "Guarantor"), entered into a Guaranty Agreement (the "Guaranty Agreement") whereby the Guarantor guarantees TI's obligations under the Accounts Receivable Agreement and Promissory Note. MTE Service is a wholly owned subsidiary of Hispania Petroleum S.A. The Company received payments of approximately \$0.6 million and \$0.7 million under the Accounts Receivable Agreement during the three and nine months ended December 31, 2017, respectively and these payments have been recorded as recovery of bad debts and included under the caption "Selling, general and administrative" in the accompanying condensed consolidated statements of operations. As of date of issuance of the Company's third quarter of Fiscal 2018 interim condensed consolidated financial statements the February 1, 2018 payment of \$1.8 million has not yet been received. The Company is currently in discussions with TI regarding the timing of this payment.

5. Inventories

Inventories are valued at the lower of cost (determined on a first in first out (“FIFO”) basis) or net realizable value and consisted of the following as of December 31, 2017 and March 31, 2017 (in thousands):

	December 31, 2017	March 31, 2017
Raw materials	\$ 14,941	\$ 15,035
Work in process	133	—
Finished goods	189	464
Total	15,263	15,499
Less non-current portion	(1,040)	(961)
Current portion	<u>\$ 14,223</u>	<u>\$ 14,538</u>

The non-current portion of inventories represents the portion of the inventories in excess of amounts expected to be sold or used in the next twelve months. The non-current inventories are primarily comprised of repair parts for older generation products that are still in operation but are not technologically compatible with current configurations. The weighted average age of the non-current portion of inventories on hand as of December 31, 2017 is 1.3 years. The Company expects to use the non-current portion of the inventories on hand as of December 31, 2017 over the periods presented in the following table (in thousands):

Expected Period of Use	Non- current Inventory Balance Expected to be Used
13 to 24 months	\$ 391
25 to 36 months	649
Total	<u>\$ 1,040</u>

6. Property, Plant and Equipment

Property, plant and equipment consisted of the following as of December 31, 2017 and March 31, 2017 (in thousands):

	December 31, 2017	March 31, 2017
Machinery, rental equipment, equipment, automobiles and furniture	\$ 15,891	\$ 17,657
Leasehold improvements	10,836	9,870
Molds and tooling	2,929	2,866
	29,656	30,393
Less, accumulated depreciation	(26,670)	(28,278)
Total property, plant and equipment, net	<u>\$ 2,986</u>	<u>\$ 2,115</u>

The Company regularly reassesses the useful lives of property and equipment and retires assets no longer in service. Depreciation expense for property and equipment was \$0.2 million and \$0.6 million for the three and nine months ended December 31, 2017, respectively. The Company recorded depreciation expense of \$0.3 million and \$1.0 million for the three and nine months ended December 31, 2016, respectively.

7. Intangible Assets

Intangible assets consisted of the following as of December 31, 2017 and March 31, 2017 (in thousands):

	December 31, 2017			
	Weighted Average Amortization Period	Intangible Assets, Gross	Accumulated Amortization	Intangible Assets, Net
Manufacturing license	17 years	\$ 3,700	\$ 3,700	\$ —
Technology	10 years	2,240	1,773	467
Trade name & parts, service and TA100 customer relationships	1.2 to 5 years	1,766	1,766	—
Total		<u>\$ 7,706</u>	<u>\$ 7,239</u>	<u>\$ 467</u>

	March 31, 2017			
	Weighted Average Amortization Period	Intangible Assets, Gross	Accumulated Amortization	Intangible Assets, Net
	Manufacturing license	17 years	\$ 3,700	\$ 3,684
Technology	10 years	2,240	1,605	635
Trade name & parts, service and TA100 customer relationships	1.2 to 5 years	1,766	1,766	—
Total		<u>\$ 7,706</u>	<u>\$ 7,055</u>	<u>\$ 651</u>

Amortization expense for the intangible assets was \$0.1 million and \$0.2 million for each of the three and nine months ended December 31, 2017 and 2016, respectively.

Expected future amortization expense of intangible assets as of December 31, 2017 is as follows (in thousands):

Year Ending March 31,	Amortization Expense
2018 (remainder of fiscal year)	56
2019	224
2020	187
Thereafter	—
Total expected future amortization	<u>\$ 467</u>

The manufacturing license provides the Company with the ability to manufacture recuperator cores previously purchased from Solar Turbines Incorporated (“Solar”). The Company is required to pay a per-unit royalty fee over a seventeen-year period for cores manufactured and sold by the Company using the technology. Royalties of approximately \$9,200 and \$7,400 were earned by Solar for the three months ended December 31, 2017 and 2016, respectively. Royalties of approximately \$22,900 and \$22,100 were earned by Solar for the nine months ended December 31, 2017 and 2016, respectively. Earned royalties of approximately \$9,200 and \$10,000 were unpaid as of December 31, 2017 and March 31, 2017, respectively, and are included in accounts payable and accrued expenses in the accompanying balance sheets.

8. Stock-Based Compensation

The following table summarizes, by statement of operations line item, stock-based compensation expense for the Company’s three and nine months ended December 31, 2017 and 2016 (in thousands):

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2017	2016	2017	2016
Cost of goods sold	\$ —	\$ 16	\$ 38	\$ 45
Research and development	4	6	16	22
Selling, general and administrative	98	152	355	586
Stock-based compensation expense	<u>\$ 102</u>	<u>\$ 174</u>	<u>\$ 409</u>	<u>\$ 653</u>

Stock Plans

2000 Equity Incentive Plan and 2017 Equity Incentive Plan

In June 2000, the Company adopted the 2000 Equity Incentive Plan (the “2000 Plan”). The 2000 Plan provides for a total maximum aggregate number of shares which may be issued of 1,849,000 shares. In June 2017, the Company’s Board of Directors (the “Board”) adopted the Capstone Turbine Corporation 2017 Equity Incentive Plan (the “2017 Plan”) which was approved by the stockholders at the Company’s 2017 annual meeting of stockholders on August 31, 2017 (the “2017 Annual Meeting”). The 2017 Plan provides for awards of up to 3,000,000 shares of common stock. The 2017 Plan is administered by the Compensation Committee designated by the Board (the “Compensation Committee”). The Compensation Committee’s authority includes determining the number of incentive awards and vesting provisions.

Stock Options

The Company issued stock options under the 2000 Plan and issues stock options under the 2017 Plan to employees, non-employee directors and consultants that vest and become exercisable over a four-year period and expire 10 years after the grant date. The Company uses a Black-Scholes valuation model to estimate the fair value of the options at the grant date, and compensation cost is recorded on a straight-line basis over the vesting period. During the year ended March 31, 2017, the Company established an accounting policy election to assume zero forfeiture for stock options and account for forfeitures when they occur through the adoption of ASU 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting (“ASU 2016-09”). All options are subject to the following vesting provisions: one-fourth vest one year after the issuance date and 1/48th vest on the first day of each full month thereafter, so that all options will be vested on the first day of the 48th month after the grant date. Information relating to stock options for the Company’s nine months ended December 31, 2017 is as follows:

	<u>Shares</u>	<u>Weighted- Average Exercise Price</u>	<u>Weighted- Average Contractual Term (in years)</u>	<u>Aggregate Intrinsic Value</u>
Options outstanding at March 31, 2017	314,537	\$ 15.48		
Granted	—	\$ —		
Exercised	—	\$ —		
Forfeited, cancelled or expired	(97,590)	\$ 3.68		
Options outstanding at December 31, 2017	<u>216,947</u>	<u>\$ 20.79</u>	<u>3.0</u>	<u>—</u>
Options fully vested at December 31, 2017 and those expected to vest beyond December 31, 2017	216,947	\$ 20.79	3.0	—
Options exercisable at December 31, 2017	<u>216,947</u>	<u>\$ 20.79</u>	<u>3.0</u>	<u>—</u>

Black-Scholes Model Valuation Assumptions

There were no stock options granted during either the three or nine months ended December 31, 2017. The Company calculated the estimated fair value of each stock option granted during the three and nine months ended December 31, 2016 on the date of grant using the Black-Scholes option-pricing model and the following weighted-average assumptions:

	<u>Three and Nine Months Ended December 31, 2016</u>
Risk-free interest rates	1.3 %
Expected lives (in years)	5.7
Dividend yield	— %
Expected volatility	133.9 %
Weighted average grant date fair value of options granted during the period	\$ 1.52

The Company’s computation of expected volatility for the three and nine months ended December 31, 2016 was based on historical volatility. The expected life, or term, of options granted is derived from historical exercise behavior and represents the period of time that stock option awards are expected to be outstanding. Management has selected a risk-free rate based on the implied yield available on U.S. Treasury Securities with a maturity equivalent to the options’ expected term. There was no expense associated with stock options during the three months ended December 31, 2017. The Company recorded expense of approximately \$8,000 associated with its stock options during the three months ended December 31, 2016. The Company recorded expense of approximately \$17,000 and \$11,000 associated with its stock options during the nine months ended December 31, 2017 and 2016, respectively.

Restricted Stock Units and Performance Restricted Stock Units

The Company issued restricted stock units under the 2000 Plan and issues restricted stock units under the 2017 Plan to employees, non-employee directors and consultants. The restricted stock units are valued based on the closing price of the Company’s common stock on the date of issuance, and compensation cost is recorded on a straight-line basis over the vesting period. During Fiscal 2017, the Company established an accounting policy election to assume zero

forfeiture for restricted stock units and account for forfeitures when they occur through the adoption of ASU 2016-09. The restricted stock units vest in equal installments over a period of four years. For restricted stock units with four year vesting, one-fourth vest annually beginning one year after the issuance date. The restricted stock units issued to non-employee directors vest one year after the issuance date. The following table outlines the restricted stock unit and performance restricted stock unit (“PRSU”) activity:

Restricted Stock and Performance Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Nonvested restricted stock units outstanding at March 31, 2017	316,709	\$ 2.85
Granted	909,848	0.76
Vested and issued	(239,372)	2.63
Forfeited	(46,168)	1.79
Nonvested restricted stock units outstanding at December 31, 2017	<u>941,017</u>	<u>0.94</u>
Restricted stock units expected to vest beyond December 31, 2017	<u>940,994</u>	<u>\$ 0.93</u>

The following table provides additional information on restricted stock units for the three and nine months ended December 31, 2017 and 2016:

	Three Months Ended		Nine Months Ended	
	December 31,		December 31,	
	2017	2016	2017	2016
Restricted stock compensation expense (in thousands)	\$ 102	\$ 165	\$ 389	\$ 540
Aggregate fair value of restricted stock units vested and issued (in thousands)	\$ 19	\$ 25	\$ 156	\$ 132
Weighted average grant date fair value of restricted stock units granted during the period	\$ 0.89	\$ 0.91	\$ 0.76	\$ 1.64

As of December 31, 2017, there was approximately \$0.7 million of total compensation cost related to unvested restricted stock units that is expected to be recognized as expense over a weighted average period of 2.3 years.

Restricted Stock Awards

The Company issued restricted stock awards under the 2000 Plan and issues restricted stock awards under the 2017 Plan to employees and non-employee directors. During the three and nine months ended December 31, 2017 and 2016 the Company granted stock awards to non-employee directors who elected to take payment of all or any part of the directors’ fees in stock in lieu of cash. The following table outlines the restricted stock award activity for the three and nine months ended December 31, 2017 and 2016:

	Three Months Ended		Nine Months Ended	
	December 31,		December 31,	
	2017	2016	2017	2016
Restricted stock awards compensation expense (in thousands)	\$ —	\$ 1	\$ 3	\$ 102
Restricted stock awards granted	—	1,389	3,969	63,500
Weighted average grant date fair value of restricted stock awards granted during the period	\$ —	\$ 0.90	\$ 0.63	\$ 1.56

For each term of the Board (beginning on the date of an annual meeting of stockholders and ending on the date immediately preceding the next annual meeting of stockholders), a non-employee director may elect to receive a stock award in lieu of all or any portion of their annual retainer or committee fee cash payment. The shares of stock were valued based on the closing price of the Company’s common stock on the date of grant.

Employee Stock Purchase Plan

In June 2000, the Company adopted the Employee Stock Purchase Plan (the “ESPP”). The ESPP provides for the granting of rights to purchase common stock to regular full and part-time employees or officers of the Company and its subsidiaries. In June 2017, the Board unanimously approved an amendment and restatement to the ESPP which was approved by the stockholders at the Company’s annual meeting of stockholders on August 31, 2017. Prior to the current amendment, 70,000 shares of the Company’s common stock had been reserved for issuance. As amended, the ESPP continued by its terms and the number of shares of the Company’s common stock available increased by 500,000 shares which reserved for issuance a total of 570,000 shares of common stock. Under the ESPP, shares of the Company’s common stock are issued upon exercise of the purchase rights. The ESPP will continue by its terms through June 30, 2020, unless terminated sooner.

Stockholder Rights Plan

On May 6, 2016, the Company entered into Amendment No. 5 (the “Amendment”) to the Rights Agreement, by and between the Company and Mellon Investor Services LLC, as Rights Agent, dated as of July 7, 2005, as amended by Amendment No. 1, dated as of July 3, 2008, Amendment No. 2, dated as of June 9, 2011, Amendment No. 3, dated as of July 1, 2014, pursuant to which Computershare Inc. became rights agent as successor-in-interest to Mellon Investor Services LLC, and Amendment No. 4, dated as of August 5, 2014, (the “Original Rights Agreement”).

The Amendment accelerated the expiration of the Company’s preferred share purchase rights (the “Original Rights”) from 5:00 p.m., Pacific Standard Time, on the 30th day after the 2017 Annual Meeting to 5:00 p.m., Pacific Standard Time, on May 6, 2016, and had the effect of terminating the Original Rights Agreement on that date. At the time of the termination of the Original Rights Agreement, all of the Original Rights distributed to holders of the Company’s common stock pursuant to the Original Rights Agreement expired.

On May 6, 2016, the Company entered into a rights agreement (the “NOL Rights Agreement”) with Computershare Inc., as rights agent. In connection with the NOL Rights Agreement, the Company’s Board authorized and declared a dividend distribution of one preferred stock purchase right (a “New Right”) for each share of the Company’s common stock authorized and outstanding. Each New Right entitles the registered holder to purchase from the Company a unit consisting of one one-thousandth of a share of Series B Junior Participating Preferred Stock, par value \$0.001 per share, at a purchase price of \$8.76 per unit, subject to adjustment. The description and terms of the New Rights are set forth in the NOL Rights Agreement.

The purpose of the NOL Rights Agreement is to diminish the risk that the Company’s ability to use its net operating losses and certain other tax assets (collectively, “Tax Benefits”) to reduce potential future federal income tax obligations would become subject to limitations by reason of the Company’s experiencing an “ownership change,” as defined in Section 382 of the Internal Revenue Code of 1986. A company generally experiences such an ownership change if the percentage of its stock owned by its “5-percent shareholders,” as defined in Section 382 of the Internal Revenue Code of 1986, increases by more than 50 percentage points over a rolling three-year period. The NOL Rights Agreement is designed to reduce the likelihood that the Company will experience an ownership change under Section 382 of the Internal Revenue Code of 1986 by (i) discouraging any person or group from becoming a 4.99% shareholder and (ii) discouraging any existing 4.99% shareholder from acquiring additional shares of the Company’s stock.

The New Rights will not be exercisable until the earlier to occur of (i) the close of business on the tenth business day after a public announcement or filing that a person has, or group of affiliated or associated persons or persons acting in concert have, become an “Acquiring Person,” which is defined as a person or group of affiliated or associated persons or persons acting in concert who, at any time after the date of the NOL Rights Agreement, have acquired, or obtained the right to acquire, beneficial ownership of 4.99% or more of the Company’s outstanding shares of common stock, subject to certain exceptions or (ii) the close of business on the tenth business day after the commencement of, or announcement of an intention to commence, a tender offer or exchange offer the consummation of which would result in any person becoming an Acquiring Person (the earlier of such dates being called the “Distribution Date”). Certain synthetic interests in securities created by derivative positions, whether or not such interests are considered to be ownership of the underlying common stock or are reportable for purposes of Regulation 13D of the Exchange Act, are treated as beneficial ownership of the number of shares of common stock equivalent to the economic exposure created by the derivative position, to the extent actual shares of the common stock are directly or indirectly held by counterparties to the derivatives contracts.

The New Rights, which are not exercisable until the Distribution Date, will expire prior to the earliest of (i) May 6, 2019 or such later day as may be established by the Board prior to the expiration of the New Rights, provided that the extension is submitted to the Company's stockholders for ratification at the next annual meeting of stockholders of the Company succeeding such extension; (ii) the time at which the New Rights are redeemed pursuant to the NOL Rights Agreement; (iii) the time at which the New Rights are exchanged pursuant to the NOL Rights Agreement; (iv) the time at which the New Rights are terminated upon the occurrence of certain transactions; (v) the close of business on the first day after the 2017 Annual Meeting of stockholders, if approval by the stockholders of the Company of the NOL Rights Agreement has not been obtained on or prior to the close of business on the first day after the 2017 Annual Meeting of stockholders; (vi) the close of business on the effective date of the repeal of Section 382 of the Internal Revenue Code of 1986, if the Board of Directors determines that the NOL Rights Agreement is no longer necessary or desirable for the preservation of Tax Benefits; and (vii) the close of business on the first day of a taxable year of the Company to which the Board determines that no Tax Benefits are available to be carried forward.

Each share of Series B Junior Participating Preferred Stock will be entitled, when, as and if declared, to a preferential per share quarterly dividend payment equal to the greater of (i) \$1.00 per share or (ii) an amount equal to 1,000 times the dividend declared per share of common stock. Each share of Series B Junior Participating Preferred Stock will entitle the holder thereof to 1,000 votes on all matters submitted to a vote of the stockholders of the Company. In the event of any merger, consolidation or other transaction in which shares of common stock are converted or exchanged, each share of Series B Junior Participating Preferred Stock will be entitled to receive 1,000 times the amount received per one share of common stock.

At the 2017 Annual Meeting, the stockholders approved the NOL Rights Agreement.

9. Offerings of Common Stock and Warrants and At-the-Market Offering Program

On October 26, 2017, the Company entered into a Warrant Exercise Agreement (the "Exercise Agreement") with a holder of the Series A warrants (the "Exercising Holder"), which Exercising Holder owns Series A warrants exercisable for 1,928,750 shares of Common Stock. Pursuant to the Exercise Agreement, the Exercising Holder and the Company agreed that the Exercising Holder would exercise its Series A warrants with respect to 1,928,750 shares of Common Stock underlying such Series A warrants for a reduced exercise price equal to \$0.90 per share. On October 27, 2017, the Company received net proceeds of approximately \$1.7 million from the exercise of the Series A warrants by the Exercising Holder. The Company did not pay any financial advisory fees in connection with the exercise of the Series A warrants by the Exercising Holder. In addition, the exercise resulted in the reduction of warrants to purchase common stock, par value \$0.001 per share, of the Company by approximately 19% and was not dilutive to existing stockholders of the Company calculated on a fully diluted basis for outstanding warrants.

On October 18, 2016, the Company entered into a securities purchase agreement with certain accredited investors, pursuant to which the Company agreed to sell 3.6 million shares of common stock, pre-funded Series B warrants to purchase up to 2.7 million shares of common stock, and Series A warrants to purchase up to 6.3 million shares of common stock. Pursuant to a placement agent agreement, dated as of October 18, 2016, the Company engaged Oppenheimer & Co. Inc. as the lead placement agent for the offering and ROTH Capital Partners, LLC as co-placement agent for the offering. Each share of common stock was sold at a price of \$1.20. Each Series B warrant was issued with an exercise price of \$1.20 per share of common stock, \$1.19 of which was pre-funded at closing and \$0.01 of which is payable upon exercise. Each Series A warrant was issued with an initial exercise price of \$1.34 per share of common stock. These Series A warrants contain anti-dilution provisions that reduce the exercise price of the warrants if certain dilutive issuances occur. The anti-dilution provisions of the Series A warrants were approved by the Company's stockholders at the 2017 annual meeting of stockholders held on August 31, 2017 and exercise price of the warrants was adjusted to \$0.60 per share. The value of this down round feature was measured using the Binomial valuation model and resulted in a loss of approximately \$0.1 million and \$0.7 million during the three and nine months ended December 31, 2017, respectively. The net proceeds to the Company from this offering, after deducting the placement agent fees and other estimated offering expenses, were approximately \$6.8 million. The offering closed on October 21, 2016.

On April 19, 2016, the Company entered into an underwriting agreement with Oppenheimer & Co. Inc. as the sole book-running manager, and Rodman & Renshaw, a unit of H.C. Wainwright & Co., LLC, as the co-manager, related to the public offering of 2.7 million shares of our common stock and pre-funded Series B warrants to purchase up to 5.5 million shares of common stock, which were offered in lieu of common stock to those purchasers whose purchase of common stock in the offering otherwise would result in the purchaser beneficially owning more than 4.99% of the

Company's outstanding common stock following the completion of the offering. Also included in the offering were Series A warrants to purchase 4.1 million shares of common stock. Every two shares of common stock were sold with one Series A warrant to purchase one share of common stock at a collective negotiated price of \$3.50. Every two Series B warrants were sold with one Series A warrant to purchase one share of common stock at a collective negotiated price of \$3.48. The Series A warrants are exercisable, subject to certain limitations, during the period commencing six months after the date of the issuance and expire five years after the first day they are exercisable. The pre-funded Series B warrants were exercisable, subject to certain limitations, upon issuance and expire nine months from the date of issuance, subject to extension under certain circumstances. The net proceeds to the Company from the sale of the common stock and warrants, after deducting fees and other offering expenses, were approximately \$13.1 million. The offering closed on April 22, 2016.

As of December 31, 2017, there were 8,478,750 Series A warrants outstanding. During Fiscal 2017, all Series B warrants were exercised and there are no Series B warrants outstanding.

Effective August 28, 2015, the Company entered into a sales agreement with respect to an at-the-market offering program pursuant to which the Company may offer and sell, from time to time at its sole discretion, shares of its common stock, having an aggregate offering price of up to \$30.0 million. The Company will set the parameters for sales of the shares, including the number to be sold, the time period during which sales are requested to be made, any limitation on the number that may be sold in one trading day and any minimum price below which sales may not be made. During the three months ended December 31, 2017, the Company issued 3.4 million shares of the Company's common stock under the at-the-market offering program and the net proceeds to the Company from the sale of the Company's common stock were approximately \$2.6 million after deducting commissions paid of approximately \$0.1 million. During the nine months ended December 31, 2017, the Company issued 9.2 million shares of the Company's common stock under the at-the-market offering program and the net proceeds to the Company from the sale of the Company's common stock were approximately \$6.5 million after deducting commissions paid of approximately \$0.2 million. As of December 31, 2017, 16.5 million shares of the Company's common stock were sold pursuant to the at-the-market offering program and the net proceeds to the Company from the sale of the common stock were approximately \$19.3 million after deducting commissions paid of approximately \$0.6 million. As of December 31, 2017, approximately \$9.6 million remained available for issuance with respect to the at-the-market offering program. These available proceeds are subject to Instruction I.B.6(a) to Form S-3 often referred to as the "Baby Shelf Rules."

10. Fair Value Measurements

The FASB has established a framework for measuring fair value using generally accepted accounting principles. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1. Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2. Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3. Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used must maximize the use of observable inputs and minimize the use of unobservable inputs.

The table below presents our assets and liabilities that are measured at fair value on a recurring basis at December 31, 2017 and are categorized using the fair value hierarchy (in thousands):

Fair Value Measurements at December 31, 2017				
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Restricted cash	\$ 5,000	\$ 5,000	\$ —	\$ —

The table below presents our assets and liabilities that are measured at fair value on a recurring basis during Fiscal 2017 and are categorized using the fair value hierarchy (in thousands):

Fair Value Measurements at March 31, 2017				
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash equivalents	\$ 7,520	\$ 7,520	\$ —	\$ —
Restricted cash	\$ 5,514	\$ 5,514	\$ —	\$ —

Cash equivalents include cash held in money market and U.S. treasury funds at March 31, 2017.

Basis for Valuation

The carrying values reported in the consolidated balance sheets for cash and cash equivalents, restricted cash, accounts receivable and accounts payable approximate fair values because of the immediate or short-term maturities of these financial instruments. As the Company's obligations under the Credit Facility are based on adjustable market rates reflective of what would currently be available to the Company, the Company has determined that the carrying value approximates the fair value. The carrying values and estimated fair values of these obligations are as follows (in thousands):

	As of		As of	
	December 31, 2017	Estimated Fair Value	March 31, 2017	Estimated Fair Value
Obligations under the credit facility	\$10,966	\$ 10,966	\$11,533	\$ 11,533

Adoption of ASU 2017-11

The Company changed its method of accounting for warrants through the early adoption of ASU 2017-11 during the three months ended June 30, 2017 on a full retrospective basis. Accordingly, the Company reclassified the warrant liability to additional paid in capital on its March 31, 2017 consolidated balance sheets, which increased additional paid-in capital by \$2.9 million and decreased warrant liability by \$2.9 million. In addition, because of the retrospective adoption, the Company credited change in fair value of warrant liability on its consolidated statements of operations by \$1.8 million, \$0.5 million and \$1.3 million for the three months ended December 31, 2016, three months ended March 31, 2017 and year ended March 31, 2017, respectively. The change in unrealized gain/loss on warrant liability was offset by a \$1.3 million credit to accumulated deficit on the consolidated balance sheets. Adoption of ASU 2017-11 had no impact on the Company's consolidated statement of cash flows in the current or previous interim and annual reporting periods. The following table provides a reconciliation of warrant liability, additional paid-in capital,

accumulated deficit and change in fair value of warrant liability on the consolidated balance sheets for the year ended March 31, 2017 (in thousands):

	Consolidated Balance Sheets		
	Warrant Liability	Additional Paid-in Capital	Accumulated deficit
Balance, March 31, 2017 (Prior to adoption of ASU 2017-11)	\$ 2,917	\$ 870,457	\$ (850,876)
Reclassified warrant liability	\$ (4,240)	\$ 4,240	\$ —
Reclassified unrealized gain on warrant liability	\$ 1,323	\$ —	\$ (1,323)
Balance, March 31, 2017 (After adoption of ASU 2017-11)	\$ —	\$ 874,697	\$ (852,199)

11. Revolving Credit Facility

Former Credit Facility The Company maintained two Credit and Security Agreements, as amended, with Wells Fargo, which provided the Company with a line of credit of up to \$20.0 million in the aggregate. As of December 31, 2016 and March 31, 2017, \$8.7 million and \$11.5 million in borrowings were outstanding, respectively, under the former credit facility. Interest expense related to the former credit facility during the nine months ended December 31, 2017 was \$0.2 million, which includes \$0.1 million in amortization of deferred financing costs. Interest expense related to the former credit facility during the three months ended December 31, 2016 was \$0.1 million, which includes \$43,800 in amortization of deferred financing costs. Interest expense related to the former credit facility during the nine months ended December 31, 2016 was \$0.4 million, which includes \$0.1 million in amortization of deferred financing costs. The Company's borrowing rate was 4.9% at March 31, 2017. Upon closing the Bridge Bank Credit Agreements with Bridge Bank the Company's existing credit facilities with Wells Fargo were paid off in full.

New Credit Facility On June 2, 2017, the Company entered into the Bridge Bank Credit Agreements with Western Alliance Bank through Bridge Bank, with credit support provided by the Export-Import Bank of the United States through its working capital guarantee program. Under the terms of the Bridge Bank Credit Agreements, the Company may borrow up to \$12.0 million on a revolving basis depending on, among other factors, the amount of its eligible inventory and accounts receivable. The Bridge Bank Credit Agreements are for a two-year period ending June 2, 2019.

Total borrowings, letter of credit obligations and the then aggregate committed amount of cash management services under the Bridge Bank Credit Agreements may not exceed 85% of the sum of unrestricted cash and the amount of cash collateral held at Bridge Bank. As a condition of the Bridge Bank Credit Agreements, the Company has restricted \$5.0 million of cash equivalents as additional security for the credit facility. Borrowings under the Bridge Bank Credit Agreements will bear per annum interest at the prime rate plus 1.5 percent, subject to increase during the occurrence of an event of default. Obligations under the Bridge Bank Credit Agreements are secured by all of the Company's assets, including intellectual property and general intangibles. The Company has incurred \$0.2 million in origination fees. These fees have been recorded under the caption "Prepaid expenses and other current assets" in the accompanying condensed consolidated balance sheets and amortized to interest expense through June 2019. As of December 31, 2017, \$11.0 million in borrowings were outstanding and \$1.0 million borrowings available under the new credit facility. Interest expense related to the new credit facility during the three months ended December 31, 2017 was \$0.2 million, which includes \$34,300 in amortization of deferred financing costs. Interest expense related to the new credit facility during the nine months ended December 31, 2017 was \$0.3 million, which includes \$0.1 million in amortization of deferred financing costs. The Company's borrowing rate was 6.0% at December 31, 2017.

The Bridge Bank Credit Agreements include affirmative covenants as well as negative covenants that prohibit a variety of actions without Bridge Bank's consent, including covenants that limit the Company's ability to (a) incur or guarantee debt, (b) create liens, (c) enter into any merger, recapitalization or similar transaction or purchase all or substantially all of the assets or stock of another entity or (d) sell, assign, transfer or otherwise dispose of the Company's assets.

The financial covenants of the domestic credit agreement with Bridge Bank (the "Domestic Facility"), which is included in the Bridge Bank Credit Agreements, requires the Company not to exceed specified levels of losses relative to its financial model and the outstanding line of credit advances may not exceed 85% of the sum of unrestricted cash and the amount of cash collateral held at Bridge Bank. The Domestic Facility also defines an event of default to include a material adverse effect on the Company's business. An event of default for this or any other reason, if not waived, could

have a material adverse effect on the Company. As of December 31, 2017 we were in compliance with the covenants contained in the Bridge Bank Credit Agreements for Fiscal 2018.

12. Accrued Warranty Reserve

The Company provides for the estimated costs of warranties at the time revenue is recognized. The specific terms and conditions of those warranties vary depending upon the microturbine product sold and geography of sale. The Company's product warranties generally start from the delivery date and continue for up to twenty-four months. Factors that affect the Company's warranty obligation include product failure rates, anticipated hours of product operations and costs of repair or replacement in correcting product failures. These factors are estimates that may change based on new information that becomes available each period. Similarly, the Company also accrues the estimated costs to address reliability repairs on products no longer in warranty when, in the Company's judgment, and in accordance with a specific plan developed by the Company, it is prudent to provide such repairs. The Company assesses the adequacy of recorded warranty liabilities quarterly and makes adjustments to the liability as necessary. When the Company has sufficient evidence that product changes are altering the historical failure occurrence rates, the impact of such changes is then taken into account in estimating future warranty liabilities. During the three months ended December 31, 2016, the Company recorded a one-time non-cash warranty provision of approximately \$5.2 million to retrofit proactively select non-Signature Series C200 microturbines with the more robust new Signature Series generator components to improve product performance and reliability. The remaining non-cash warranty provision of approximately \$0.6 million for this reliability repair program was reversed during the three months ended December 31, 2017 because the program was completed. Changes in accrued warranty reserve during the nine months ended December 31, 2017 are as follows (in thousands):

Balance, beginning of the period	\$ 3,766
Standard warranty provision	1,370
Accrual related to reliability repair programs	(760)
Deductions for warranty claims	(2,616)
Balance, end of the period	<u>\$ 1,760</u>

13. Deferred Revenue

As of December 31, 2017 the balance of deferred revenue was approximately \$5.2 million compared to \$5.0 million as of March 31, 2017. This overall increase in the balance of deferred revenue of \$0.2 million during the nine months ended December 31 2017 was comprised of an increase in deferred revenue attributable to deposits of \$0.3 million, offset by a decrease in deferred revenue attributable to Comprehensive Factory Protection Plan ("FPP") contracts of \$0.1 million. Changes in deferred revenue during the nine months ended December 31, 2017 are as follows (in thousands):

FPP Balance, beginning of the period	\$ 3,414
FPP Billings	10,985
FPP Revenue recognized	(11,055)
Balance attributed to FPP contracts	3,344
Deposits	1,888
Deferred revenue balance, end of the period	<u>\$ 5,232</u>

Deferred revenue attributed to FPP contracts represents the unearned portion of the billed agreements. FPP agreements are generally paid quarterly in advance with revenue recognized on a straight line basis over the contract period. Deposits are primarily non-refundable cash payments from distributors for orders to be delivered in the future.

14. Other Current Liabilities

The Company is a party to a Development and License Agreement with Carrier Corporation, dated as of September 4, 2007 ("Carrier") regarding the payment of royalties on the sale of each of the Company's 200 kilowatt ("C200") microturbines. Carrier earned \$0.3 million and \$0.2 million in royalties for C200 and C1000 Series system sales during the three months ended December 31, 2017 and 2016, respectively. Carrier earned \$0.7 million and \$0.6 million in royalties for C200 and C1000 system sales during the nine months ended December 31, 2017 and 2016,

respectively. Earned royalties of approximately \$0.3 million were unpaid as of December 31, 2017 and March 31, 2017, respectively, and are included in accrued expenses in the accompanying balance sheets.

Impacts of Tax Legislation

On December 22, 2017, the Tax Cuts and Jobs Act was signed into legislation. The Company is currently evaluating the impact of the Tax Cuts and Job Act on its condensed consolidated financial statements and related disclosures for Fiscal 2018 and cannot be determined with certainty at this time because of a blended rate. Any impact against the Company's gross deferred tax asset will be offset by a 100% valuation allowance, therefore the Company expects no material impact on its condensed consolidated financial statements. The Company will continue to review the components of the Tax Cuts and Job Act and its related regulations and evaluate their impact to its condensed consolidated financial statements and related disclosures for Fiscal 2018.

15. Commitments and Contingencies

Purchase Commitments

As of December 31, 2017, the Company had firm commitments to purchase inventories of approximately \$27.2 million through Fiscal 2019. Certain inventory delivery dates and related payments are not firmly scheduled; therefore, amounts under these firm purchase commitments will be payable upon the receipt of the related inventories.

Lease Commitments

The Company leases offices and manufacturing facilities under various non-cancelable operating leases expiring at various times through Fiscal 2020. All of the leases require the Company to pay maintenance, insurance and property taxes. The lease agreements for primary office and manufacturing facilities provide for rent escalation over the lease term and renewal options for five-year periods. Rent expense is recognized on a straight-line basis over the term of the lease. The difference between rent expense recorded and the amount paid is credited or charged to deferred rent, which is included in other long-term liabilities in the accompanying balance sheets. The balance of deferred rent was approximately \$0.1 million and \$0.2 million as of December 31, 2017 and March 31, 2017, respectively. Rent expense was approximately \$0.5 million and \$0.6 million during the three months ended December 31, 2017 and 2016, respectively. Rent expense was approximately \$1.6 million and \$1.7 million during the nine months ended December 31, 2017 and 2016, respectively.

On June 7, 2017 the Company and Prologis, L.P entered into a Fourth Amendment to Lease (the "Van Nuys Fourth Amendment") to amend the Lease by extending the term of the Lease for a period of sixty-two (62) months commencing on December 31, 2017 through February 28, 2023. The Van Nuys Fourth Amendment also adjusts the monthly base rent payable by the Company under the Lease Agreement to the following: \$0 per month from January 1, 2018 through February 28, 2018; \$66,846 per month from March 1, 2018 through December 31, 2018; \$68,852 per month from January 1, 2019 through December 31, 2019; \$70,917 per month from January 1, 2020 through December 31, 2020; \$73,045 per month from January 1, 2021 through December 31, 2021; \$75,236 per month from January 1, 2022 through December 31, 2022; and \$77,493 per month from January 1, 2023 through February 28, 2023. The Van Nuys Fourth Amendment also provides the Company with an option to extend the Lease by an additional five-year term following the expiration of the term of the Lease as amended by the Van Nuys Fourth Amendment and provides that Prologis, L.P. will contribute a tenant improvement allowance toward the Company's approved alterations to the premises.

Other Commitments

The Company has agreements with certain of its distributors requiring that if the Company renders parts obsolete in inventories the distributors own and hold in support of their obligations to serve fielded microturbines, then the Company is required to replace the affected stock at no cost to the distributors. While the Company has never incurred costs or obligations for these types of replacements, it is possible that future changes in the Company's product technology could result and yield costs to the Company if significant amounts of inventory are held at distributors. As of December 31, 2017, no significant inventories were held at distributors.

Legal Matters

Federal Securities Class Action

Two putative securities class action complaints were filed against the Company and certain of its current and former officers in the United States District Court for the Central District of California under the following captions: David Kinney, etc. v. Capstone Turbine, et al., No. 2:15-CV-08914 on November 16, 2015 (the “Kinney Complaint”) and Kevin M. Grooms, etc. v. Capstone Turbine, et al., No. 2:15-CV-09155 on December 18, 2015 (the “Grooms Complaint”).

The putative class in the Kinney Complaint is comprised of all purchasers of the Company’s securities between November 7, 2013 and November 5, 2015. The Kinney Complaint alleges material misrepresentations and omissions in public statements regarding BPC and the likelihood that BPC would not be able to fulfill many legal and financial obligations to the Company. The Kinney Complaint also alleges that the Company’s financial statements were not appropriately adjusted in light of this situation and were not maintained in accordance with GAAP, and that the Company lacked adequate internal controls over accounting. The Kinney Complaint alleges that these public statements and accounting irregularities constituted violations by all named defendants of Section 10(b) of the Exchange Act, and Rule 10b-5 thereunder, as well as violations of Section 20(a) of the Exchange Act by the individual defendants. The Grooms Complaint makes allegations and claims that are substantially identical to those in the Kinney Complaint, and both complaints seek compensatory damages of an undisclosed amount. On January 16, 2016, several shareholders filed motions to consolidate the Kinney and Grooms actions and for appointment as lead plaintiff. On February 29, 2016, the Court granted the motions to consolidate, and appointed a lead plaintiff. On May 6, 2016, a Consolidated Amended Complaint with allegations and claims substantially identical to those of the Kinney Complaint was filed in the consolidated action. The putative class period in the Consolidated Amended Complaint is June 12, 2014 to November 5, 2015. Defendants filed a motion to dismiss the Consolidated Amended Complaint on June 17, 2016. On March 10, 2017, the Court issued an order granting Defendants’ motion to dismiss in its entirety with leave to amend. Plaintiffs filed an amended complaint on April 28, 2017. Defendants’ motion to dismiss was filed June 2, 2017. Plaintiffs filed their opposition to the motion to dismiss on July 7, 2017, and Defendants filed their reply in support of the motion to dismiss on July 28, 2017. The court vacated the hearing that was scheduled for August 18, 2017. The Company has not recorded any liability as of December 31, 2017 since any potential loss is not probable or reasonably estimable given the preliminary nature of the proceedings.

State Derivative Lawsuits — California

On February 18, 2016, a purported shareholder derivative action was filed in Los Angeles Superior Court in the State of California against the Company and certain of its current and former officers and directors under the following caption: Stesiak v. Jamison, et al., No. BC610782. The lawsuit alleges that certain of the Company’s current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to the Company, but allowed the Company to make false and misleading statements regarding BPC and the Company’s financial condition. The complaint also alleges that the defendants failed to timely adjust the Company’s account receivables and backlog to reflect BPC’s inability to pay the Company. The complaint asserts causes of action for breach of fiduciary duty and unjust enrichment. It demands damages for the amount of damage sustained by the Company as a result of the individual defendants’ alleged breach of fiduciary duties and unjust enrichment, that the Company institute corporate governance reforms, and disgorgement from the individual defendants. On May 5, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants’ motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. On May 10, 2016, the Court entered that proposed order. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed. A status conference is scheduled for March 7, 2018.

On June 8, 2016, a purported shareholder derivative action entitled Velma Kilpatrick v. Simon, et al., No. BC623167, was filed in Los Angeles Superior Court in the State of California against the Company and certain of its current and former officers and directors. The complaint alleges that certain of the Company’s current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to the Company, but allowed the Company to make false and misleading statements regarding BPC and the Company’s financial condition. The complaint also alleges that the defendants failed to timely adjust the Company’s account receivables and backlog to reflect BPC’s inability to pay the Company. The complaint asserts causes of action for breach of fiduciary duty. It demands damages for the amount of damage sustained by the Company as a result of the individual defendants’

alleged breach of fiduciary duties, and that the Company institute corporate governance reforms. On August 23, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed. A status conference is scheduled for February 7, 2018.

On December 27, 2016, a purported shareholder derivative action entitled *Andre Rosowsky v. Jamison, et al.*, No. 30-2016-00894859-CU-MC-CJC was filed in Orange County Superior Court in the State of California against the Company and certain of its current and former officers and directors. The complaint alleges that certain of the Company's current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to the Company, but allowed the Company to make false and misleading statements regarding BPC and the Company's financial condition. The complaint also alleges that the defendants failed to timely adjust the Company's account receivables and backlog to reflect BPC's inability to pay the Company. The complaint asserts causes of action for breach of fiduciary duty and unjust enrichment. It demands damages for the amount of damage sustained by the Company as a result of the individual defendants' alleged breach of fiduciary duties, that the Company institute corporate governance reforms, and restitution from the individual defendants. On April 14, 2017, the case was removed to the United States District Court for the Central District of California. On May 5, 2017, the plaintiff voluntarily dismissed his complaint without prejudice.

Federal Derivative Lawsuits

On March 7, 2016, a purported shareholder derivative action was filed in the United States District Court for the Central District of California against the Company and certain of its current and former officers and directors under the following caption: *Haber v. Jamison, et al.*, No. CV16-01569-DMG (RAOx). The lawsuit alleges that certain of the Company's current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to the Company, but allowed the Company to make false and misleading statements regarding BPC and the Company's financial condition. The complaint asserts a cause of action for breach of fiduciary duty. It demands damages for the amount of damage sustained by the Company as a result of the individual defendants' alleged breach of fiduciary duties, and equitable relief, including that the Company institute appropriate corporate governance reforms. On May 11, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. On May 13, 2016, the Court entered that proposed order. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed.

On July 12, 2016 and July 18, 2016, respectively, two additional purported shareholder derivative actions were filed in the United States District Court for the Central District of California against the Company and certain of its current and former officers and directors, under the caption *Tuttle v. Atkinson, et al.*, No. CV16-05127, and *Boll v. Jamison, et al.*, No. CV16-5282, respectively. The lawsuits allege that certain of the Company's current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to the Company, but allowed the Company to make false and misleading statements regarding BPC and the Company's financial condition. The Tuttle complaint asserts causes of action for breach of fiduciary duty, gross mismanagement, and unjust enrichment, and the Boll complaint asserts causes of action for breach of fiduciary duty, unjust enrichment, abuse of control, gross mismanagement, and waste of corporate assets. Both complaints demand damages sustained by the Company as a result of the individual defendants' alleged breaches of fiduciary duties, and equitable relief, including that the Company institute appropriate corporate governance reforms. The federal derivative actions have been stayed until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. Given that the federal securities class action was dismissed with leave to amend, these cases are still stayed.

Shareholder Demand

Following the dismissal without prejudice of his purported shareholder derivative action discussed above, former plaintiff in *Andre Rosowsky v. Jamison, et al.* sent us a letter dated July 7, 2017 (the "Shareholder Demand") demanding that the Board take action to remedy purported breaches of fiduciary duties allegedly related to the claims asserted in the above-discussed securities class action and derivative actions. The Company acknowledged the Shareholder Demand on July 25, 2017. The Board has formed a committee to evaluate the Shareholder Demand.

16. Net Loss Per Common Share

Basic loss per share of common stock is computed using the weighted average number of common shares outstanding for the period. Diluted loss per share is computed without consideration to potentially dilutive instruments because the Company incurred losses in the three months ended December 31, 2017 which would make these instruments anti-dilutive. As of December 31, 2017 and 2016, the number of anti-dilutive stock options and restricted stock units excluded from diluted net loss per common share computations was approximately 1.2 million and 0.7 million, respectively. As of December 31, 2017 and 2016, the number of warrants excluded from diluted net loss per common share computations was approximately 8.5 million and 6.8 million, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes included in this Form 10-Q and in our Annual Report on Form 10-K for Fiscal 2017. When used in this Form 10-Q, and in the following discussion, the words “believes”, “anticipates”, “intends”, “expects” and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties which could cause actual results to differ materially from those projected. These risks include those under Risk Factors in our Annual Report on Form 10-K for Fiscal 2017 and in other reports we file with the Securities and Exchange Commission (“SEC”). Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We assume no obligation to update any of the forward-looking statements contained herein after the filing of this Form 10-Q to conform such statements to actual results or changes in expectations except as may be required by law. All dollar amounts are approximate.

Overview

We are the market leader in microturbines based on the number of microturbines sold. Generally, power purchased from the electric utility grid is less costly than power produced by distributed generation technologies. Utilities may also charge fees to interconnect to their power grids. However, we can provide economic benefits to end users in instances where the waste heat from our microturbine has value (combined heat and power (“CHP”) and combined cooling, heat and power (“CCHP”)), where fuel costs are low (renewable energy/renewable fuels), where the costs of connecting to the grid may be high or impractical (such as remote power applications), where reliability and power quality are of critical importance, or in situations where peak shaving could be economically advantageous because of highly variable electricity prices. Because our microturbines can provide a reliable source of power and can operate on multiple fuel sources, we believe they offer a level of flexibility not currently offered by other technologies such as reciprocating engines.

We continue to execute on our three-pronged business profitability plan to reduce operating expenses; diversify and increase revenue; and improve gross margin. During the third quarter of the fiscal year ended March 31, 2018 (“Fiscal 2018”) our net loss decreased by 97% to \$0.3 million and our basic and diluted loss per share improved by 97% to \$0.01 compared to \$10.7 million and \$0.31, respectively, in the same period of the previous year. The improvement in the net loss during the third quarter of Fiscal 2018 was primarily the result of an increase in revenue of approximately 13% and reduction of operating expenses of approximately 18% from the third quarter of Fiscal 2017. In addition, during the third quarter of Fiscal 2018 our field retrofit program for select non-Signature Series C200 microturbines was completed, which resulted in the reversal of the remaining non-cash warranty provision of approximately \$0.6 million. The improvement in the net loss per share during the third quarter of Fiscal 2018 was primarily the result of a decrease in the net loss and an increase in weighted average shares outstanding to 46.8 million for the third quarter of Fiscal 2018 from 34.8 million for the third quarter of Fiscal 2017. The nine months of Fiscal 2018 was characterized by the growth in our total revenue and strengthening aftermarket business on substantially lower operating expense, compared to the nine months of Fiscal 2017. Our revenue from the United States and Canadian geographic markets during the nine months of Fiscal 2018, improved to approximately 55% of revenue compared to 37% of revenue the same period last year primarily because the natural resources market continues to improve. Although we have experienced an improvement in revenue during the nine months of Fiscal 2018 due to a rebound in oil prices, we continue to be impacted by the volatility of the global oil and gas markets and the ongoing geopolitical tensions in Russia, North Africa and the Middle East. Additionally, though the dollar has somewhat weakened, it still continues to be an issue in select markets as the strong dollar makes our products more expensive in those markets.

Our products continue to gain interest in all six of the major vertical markets (energy efficiency, renewable energy, natural resources, critical power supply, transportation and marine). In the energy efficiency market, we continue to expand our market presence in hotels, office buildings, hospitals, retail and industrial applications globally. The renewable energy market is fueled by landfill gas, biodiesel, and biogas from sources such as food processing, agricultural waste and livestock manure. Our product sales in the oil and gas and other natural resources market is driven by our microturbines’ reliability, emissions profile and ease of installation. Given the volatility of the oil and gas market, our business strategy is to target projects within the energy efficiency and renewal energy markets. However, we experienced growth in the natural resources market during the third quarter of Fiscal 2018 primarily because oil prices rebounded above \$60.00 per barrel. We have also seen increased interest in critical power supply applications as customers want solutions that can handle both primary and backup power.

We continue to focus on improving our products based on customer input, building brand awareness and new channels to market by developing a diversified network of strategic distribution partners. Our focus is on products and solutions that provide near term opportunities to drive repeatable business rather than discrete projects for niche markets. In addition, management closely monitors operating expenses and strives to improve manufacturing efficiencies while simultaneously lowering direct material costs and increasing average selling prices. The key drivers to our success are revenue growth, higher average selling prices, lower direct material costs, positive new order flow and reduced cash usage.

An overview of our direction, targets and key initiatives are as follows:

1. **Focus on Vertical Markets** Within the distributed generation markets that we serve, we focus on vertical markets that we identify as having the greatest near-term potential. In our primary products and applications (energy efficiency, renewable energy, natural resources, critical power supply, transportation and marine), we identify specific targeted vertical market segments. Within each of these segments, we identify what we believe to be the critical factors to success and base our plans on those factors. Given the volatility of the oil and gas market, we have refocused our business strategy to target projects within the energy efficiency and renewable energy markets.

The following table summarizes our product shipments by vertical markets:

	Three Months Ended		Nine Months Ended	
	December 31,		December 31,	
	2017	2016	2017	2016
Energy efficiency	32%	53%	50%	58%
Natural resources	60%	38%	40%	34%
Renewable energy	8%	8%	10%	8%
Critical Power Supply	—	1%	—	<1%

Energy Efficiency—CHP/CCHP

Energy efficiency refers to the proper utilization of both electrical and thermal energies in the power production process. In such applications, our microturbines are able to maximize the availability of usable energy to provide a significant economic advantage to customers while reducing their on-site emissions. CHP and CCHP can improve site economics by capturing the waste heat created from a single combustion process to increase the efficiency of the total system, from approximately 30 percent to 80 percent or more. Compared with more traditional, independent generation sources, the increase in operational efficiency also reduces greenhouse gas emissions through the displacement of other separate systems, which can also reduce operating costs.

Natural Resources—Oil, Natural Gas, Shale Gas & Mining

Our microturbines are installed in the natural resource market for use in both onshore and offshore applications, including oil and gas exploration, production, and at compression and transmission sites as a highly efficient and reliable source of power. In some cases, these oil and gas or mining operations have no electric utility grid and rely solely on power generated on-site. There are numerous locations, on a global scale, where the drilling, production, compression and transportation of natural resources and other extraction and production processes create fuel byproducts, which are traditionally burned or released into the atmosphere. Our microturbines can turn these fuel byproducts - flare gas or associated gas, into a useable fuel to provide prime power to these sites.

Renewable Energy

There is a growing transition to renewable energy sources and technologies happening on a global scale. Our microturbines run efficiently on renewable fuels such as methane and other biogases from landfills, wastewater treatment facilities and other small biogas applications like food processing plants, livestock farms and agricultural waste operations. Microturbines can burn these renewable fuels with minimal emissions, thereby, and in some cases, avoiding the imposition of penalties incurred for pollution while simultaneously producing electricity from this “free” fuel source for use at the site or in the surrounding areas. Our microturbines have

demonstrated effectiveness in these smaller applications and may outperform conventional combustion engines in some situations, including when the gas contains a high amount of sulfur.

Critical Power Supply

Because of the potentially catastrophic consequences of system failure, momentary or otherwise, certain high demand power users, including high technology, health care and information systems facilities require higher levels of reliability in their power generation service. To meet these customer requirements, traditional solutions utilize UPS to protect critical loads from power disturbances along with back-up diesel generators for extended outages. We offer an alternative solution that can both meet customer reliability requirements and reduce operating costs.

Transportation

Our technology also can be used in hybrid electric vehicle (“HEV”) applications. Our customers have applied our products in HEV applications such as transit buses and Class 7 and 8 work trucks. In these applications, the microturbine acts as an onboard battery charger to recharge the battery system as needed. The benefits of microturbine-powered HEV include extended range, fuel economy gains, quieter operation, reduced emissions and higher reliability when compared with traditional internal combustion engines. Internal combustion diesel engine manufacturers have been challenged for the last several years to develop technology improvements, prior to aftertreatment that reduce emissions to levels specified by the EPA and CARB 2007 and 2010 standards. Many manufacturers are incorporating aftertreatment that increases upfront equipment costs, vehicle weight and life cycle costs, which may reduce overall engine efficiency.

Marine

Our technology is also used in marine applications. Our customers have applied our products in the commercial vessel and luxury yacht market segments. The most feasible application for our marine products is for use as a ship auxiliary engine. In this application, the microturbines provide power to the vessel’s electrical loads and, in some cases, the vessel is able to utilize the exhaust energy to increase the overall efficiency of the application, thereby reducing overall fuel consumption and emissions. Another feasible application is similar to our HEV application where the vessel is driven by an electric propulsion system and the microturbine serves as an on board range extender.

Product Backlog

Net product orders were \$7.2 million and \$11.5 million for the three months ended December 31, 2017 and 2016, respectively. Ending product backlog was \$103.5 million at December 31, 2017 compared to \$107.8 million at December 31, 2016. Book-to-bill ratio was 0.5:1 and 0.9:1 for the three months ended December 31, 2017 and 2016, respectively. Book-to-bill ratio is the ratio of new orders we received to units shipped and billed during a period.

A portion of our product backlog is concentrated in the international oil and gas market which may impact the overall timing of shipments or the conversion of backlog to revenue. The timing of the backlog is based on the requirement date indicated by our customers. However, based on historical experience, management expects that a significant portion of our product backlog may not be shipped within the next 18 months. Additionally, the timing of shipments is subject to change based on several variables (including customer deposits, payments, availability of credit and customer delivery schedule changes), most of which are not in our control and can affect the timing of our revenue. This includes the backlog related to BPC Engineering (“BPC”), one of our former Russian distributors that may be negatively impacted by the new distributor for the Russian oil and gas market. As a result, management believes the book-to-bill ratio demonstrates the current demand for our products in the given period.

2. ***Sales and Distribution Channels*** We seek out distributors that have business experience and capabilities to support our growth plans in our targeted markets. We have a total of 101 distributors and Original Equipment Manufacturers (“OEMs”). In the United States and Canada, we currently have 23 distributors and

OEMs. Outside of the United States and Canada, we currently have 78 distributors and OEMs. We continue to refine the distribution channels to address our specific targeted markets.

3. **Service** We provide service primarily through our global distribution network. Together with our global distribution network we offer a comprehensive FPP for a fixed annual fee to perform regularly scheduled and unscheduled maintenance as needed. We provide factory and on-site training to certify all personnel that are allowed to perform service on our microturbines. FPPs are generally paid quarterly in advance.

Our FPP backlog as of December 31, 2017 was \$75.1 million, which represents the value of the contractual agreement for FPP services that has not been earned and extends through Fiscal 2031. Our FPP backlog as of December 31, 2016 was \$77.2 million. Our FPP backlog as of March 31, 2017 was \$77.1 million.

4. **Product Robustness and Life Cycle Maintenance Costs** We continue to invest in enhancements that relate to high performance and high reliability. An important element of our continued innovation and product strategy is to focus on the engineering of our product hardware and electronics to make them work together more effectively and deliver improved microturbine performance, reliability and low maintenance cost to our customers.
5. **New Product Development** Our new product development is targeted specifically to meet the needs of our selected vertical markets. We expect that our existing product platforms, the C30, C65, C200 and C1000 Series microturbines, will be our foundational product lines for the foreseeable future. Our research and development project portfolio is centered on enhancing the features of these base products. More recently, due to our cost reduction efforts, our focus is on expanding the existing products, including the launch of our C1000 Signature Series microturbine in December 2015. During the three months ended December 31, 2017 our development activities included a new cleanable severe environment air filtration system for our innovative line of microturbine products.

Our product development activities during Fiscal 2017 included new-patented fuel injector and certification of our C65 microturbine to applicable European Union medium voltage grid interconnection standards. In addition, we continued our development in our C200S ICHP microturbine and overall cost reduction for our Signature Series. We developed a new-patented multi-staged lean pre-vaporizing, pre-mixing fuel injector providing ultra-low emissions that meet EPA Tier 4 requirements for power generation. Under this new program, exhaust emissions from these engines will be required to decrease by more than 90%. Our C65, C200 and C1000 Series microturbines became VDE, BDEW and CEI certified during Fiscal 2017. These new standards were attained following the development and implementation of new microturbine system software architecture. The C200S microturbine incorporates numerous system and design upgrades intended to improve overall product quality, reliability, and performance. Our new C200S ICHP product further supports our effort to diversify our business into the CHP and CCHP energy efficiency markets and the new roof mounted integrated CHP heat recovery modules, designed specifically for our Signature Series product, is expected to add additional revenue opportunities.

6. **Cost and Core Competencies** We believe that the core competencies of our products are air bearing technology, advanced combustion technology and sophisticated power electronics to form efficient and ultra-low emission electricity and cooling and heat production systems. Our core intellectual property is contained within our air bearing technology. We continue to review avenues for cost reduction by sourcing to the best value supply chain option. In order to utilize manufacturing facilities and technology more effectively, we are focused on continuous improvements in manufacturing processes. Additionally, considerable effort is being directed to manufacturing cost reduction through process improvement, product design, advanced manufacturing technology, supply management and logistics. Management expects to be able to leverage our costs as product volumes increase.

We believe that effective execution in each of these key areas will be necessary to leverage Capstone's promising technology and early market leadership into achieving positive cash flow with growing market presence and improving financial performance. Based on our recent progress and assuming achievement of targeted cost reductions and product mix, pricing and performance, our updated financial model indicates that we will achieve positive cash flow when we generate \$25 million in quarterly revenue with a 20% gross margin. During the third quarter of Fiscal 2018, we consolidated our operations and offices into our Van Nuys location and we believe that our production capacity is

approximately 2,000 units per year, depending on product mix. We believe we will be able to support this production capacity level by adding additional shifts, which would increase working capital requirements, and making some additional capital expenditures when necessary.

Critical Accounting Policies and Estimates

The preparation of our condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. Management believes the most complex and sensitive judgments, because of their significance to the condensed consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Actual results could differ from management's estimates. Management believes the critical accounting policies listed below affect our more significant accounting judgments and estimates used in the preparation of the condensed consolidated financial statements. These policies are described in greater detail in our Annual Report on Form 10-K for Fiscal 2017 and continue to include the following areas:

- Impairment of long-lived assets, including intangible assets with finite lives;
- Inventory write-downs and classification of inventories;
- Estimates of warranty obligations;
- Accounts receivable allowances;
- Deferred tax assets and valuation allowance; and
- Stock-based compensation expense.

Results of Operations

Three Months Ended December 31, 2017 and 2016

The following table summarizes our revenue by geographic markets (amounts in millions):

	Three Months Ended December 31,	
	2017	2016
	Revenue	Revenue
United States and Canada	\$ 14.7	\$ 9.1
Europe and Russia	3.6	6.0
Latin America	2.0	2.3
Asia and Australia	2.4	1.4
Middle East and Africa	0.1	1.4
Total	<u>\$ 22.8</u>	<u>\$ 20.2</u>

Revenue Revenue for the three months ended December 31, 2017 increased \$2.6 million, or 13%, to \$22.8 million from \$20.2 million for the three months ended December 31, 2016. The change in revenue for the three months ended December 31, 2017 compared to the three months ended December 31, 2016 included increases in revenue of \$5.6 million from the United States and Canadian markets and \$1.0 million from the Asian and Australian markets. These overall increases in revenue were offset by decreases in revenue of \$2.4 million from the European and Russian markets, \$1.3 million from the Middle East and African markets and \$0.3 million from the Latin American market. The increase in revenue in the United States and Canadian markets during the three months ended December 31, 2017 compared to the same period the previous year was primarily because the natural resources vertical market continues to improve in these markets because of the rebound in oil prices. The increase in revenue in the Asian and Australian markets was primarily the result of large non-recurring microturbine product shipments for specific projects that had occurred during the three months ended December 31, 2017. The decrease in revenue in the European market during the three months ended December 31, 2017 compared to the same period in the previous year was primarily because of the uncertainty of the regulatory environment. The decrease in the Russia, North Africa and the Middle East markets was primarily the result of the ongoing geopolitical tensions in these areas. The decrease in revenue in the Latin American market during

the three months ended December 31, 2017 compared to the same period the previous year was primarily the result of the continuing softness related to changes in the electrical interconnect and utility tariffs in Mexico.

The following table summarizes our revenue (revenue amounts in millions):

	Three Months Ended December 31,					
	2017			2016		
	Revenue	Megawatts	Units	Revenue	Megawatts	Units
Microturbine Product	\$ 14.6	14.3	75	\$ 12.8	13.2	61
Accessories and Parts	4.3			3.7		
Service	3.9			3.7		
Total Accessories, Parts and Service	8.2			7.4		
Total	\$ 22.8			\$ 20.2		

For the three months ended December 31, 2017, revenue from microturbine products increased \$1.8 million, or 14%, to \$14.6 million from \$12.8 million for the three months ended December 31, 2016. Megawatts shipped during the three months ended December 31, 2017 increased 1.1 megawatts, or 8%, to 14.3 megawatts from 13.2 megawatts during the three months ended December 31, 2016. The increase in revenue and megawatts shipped was because of a shift in product mix, as we sold a higher number of our C65 and C200 systems during the three months ended December 31, 2017 compared to the same period last year. The timing of shipments is subject to change based on several variables (including customer deposits, payments, availability of credit and delivery schedule changes), most of which are not within our control and can affect the timing of our revenue. Average revenue per megawatt shipped was approximately \$1.0 million during each of the three months ended December 31, 2017 and 2016.

For the three months ended December 31, 2017, revenue from our accessories and parts increased \$0.6 million, or 16%, to \$4.3 million from \$3.7 million for the three months ended December 31, 2016. The increase in revenue from accessories and parts was primarily because of higher accessories shipments of our heat recovery modules and parts shipments during three months ended December 31, 2017 compared to the prior year. The increase in parts shipments was primarily due to timing of certain parts sales promotions and the ongoing focus for our distributor's to stock necessary parts.

Service revenue for the three months ended December 31, 2017 increased \$0.2 million, or 5%, to \$3.9 million from \$3.7 million for the three months ended December 31, 2016. The increase in service revenue was primarily the result of our growing installed base and an increase in our energy efficiency customers purchasing our FPP service agreements.

Sales to E-Finity Distributed Generation, LLC ("E-Finity") and Cal Microturbine ("CAL"), two of the Company's domestic distributors, accounted for 29% and 14%, respectively, of revenue for the three months ended December 31, 2017. Sales to BPC Engineering ("BPC"), one of the Company's former Russian distributors, and Horizon Power Systems ("Horizon"), one of the Company's domestic distributors, each accounted for 16% of revenue for the three months ended December 31, 2016.

Gross Margin Cost of goods sold includes direct material costs, production and service center labor and overhead, inventory charges and provision for estimated product warranty expenses. The gross margin was \$5.0 million, or 22% of revenue, for the three months ended December 31, 2017 compared to a negative gross margin of \$4.0 million, or negative 20% of revenue, for the three months ended December 31, 2016. The increase in gross margin of \$9.0 million, compared to the three months ended December 31, 2016 was primarily because of lower expenses associated with warranty costs of \$6.1 million, a shift in product mix of \$1.9 million and decrease in production and service center labor and overhead expense of \$1.1 million, offset by an increase in inventory charges of \$0.1 million. In addition to consolidating our manufacturing processes into our Van Nuys location, management continues to implement initiatives to improve gross margin in Fiscal 2018 by further reducing manufacturing overhead and fixed and direct material costs and improving product performance as we work to achieve profitability.

Warranty expense is a combination of a standard warranty provision recorded at the time revenue is recognized and changes, if any, in estimates for reliability repair programs. Reliability repair programs are based upon estimates that are recorded in the period that new information becomes available, including design changes, cost of repair and product

enhancements, which can include both in-warranty and out-of-warranty systems. The decrease in warranty expense of \$6.1 million during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 reflects decreases in reliability repair programs, warranty accommodations and warranty claims in the current period. During the three months ended December 31, 2016, we recorded a one-time non-cash warranty provision of approximately \$5.2 million to retrofit proactively select non-Signature Series C200 microturbines with the more robust new Signature Series generator components to improve product performance and reliability. The remaining non-cash warranty provision of approximately \$0.6 million for this reliability repair program was reversed during the three months ended December 31, 2017 because the program was completed. Management expects warranty expense in Fiscal 2018 to be lower than in Fiscal 2017 primarily because of a decrease in reliability repair programs.

Production and service center labor and overhead expense decreased \$1.1 million during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 because of decreases in supplies expense of \$0.6 million, facilities expense of \$0.2 million, consulting expense of \$0.1 million, salaries expense of \$0.1 million and lower overhead allocated to finished goods inventory of \$0.1 million.

Inventory charges increased \$0.1 million during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 primarily as the result of an increase in reserve for excess and obsolete inventory.

The following table summarizes our gross margin (in millions except percentages):

	Three Months Ended December 31,	
	2017	2016
Gross Margin		
Product	\$ 1.6	\$ (6.6)
As a percentage of product revenue	11 %	(52)%
Accessories, parts and service	\$ 3.4	\$ 2.6
As a percentage of accessories, parts and service revenue	42 %	35 %
Total Gross Margin	<u>\$ 5.0</u>	<u>\$ (4.0)</u>
As a percentage of total revenue	22 %	(20)%

Product gross margin increased to 11% during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 primarily because of a decrease in warranty expense, a favorable shift in product mix, and lower production and service center labor and overhead expense in the current period, offset by an increase in inventory charges. The decrease in warranty expense during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 reflects the reversal of the remaining non-cash warranty provision of approximately \$0.6 million during the three months ended December 31, 2017 compared to a one-time non-cash warranty provision of approximately \$5.2 million was recorded during the three months ended December 31, 2016. Accessories, parts and service gross margin increased to 42% during the three months ended December 31, 2017 compared to the three months ended December 31, 2016 primarily because of higher parts shipments, accessories shipments of our heat recovery modules, increase in energy efficiency customers purchasing our FPP service agreements and timing of FPP services performed.

Research and Development (“R&D”) Expenses R&D expenses for the three months ended December 31, 2017 decreased \$0.3 million, or 23%, to \$1.0 million from \$1.3 million in the three months ended December 31, 2016. The overall decrease in R&D expenses of approximately \$0.3 million resulted from decrease in salaries expense of \$0.3 million. This overall decrease was a result of the reduction of the number of active research projects, because of our initiatives to reduce operating expenses and achieve profitability. Management expects R&D expenses in Fiscal 2018 to be lower than in Fiscal 2017 as a result of the continued cost reduction initiatives.

Selling, General, and Administrative (“SG&A”) Expenses SG&A expenses for the three months ended December 31, 2017 decreased \$0.8 million, or 17%, to \$4.0 million from \$4.8 million for the three months ended December 31, 2016. The net decrease in SG&A expenses was comprised of decreases of approximately \$0.1 million in both facilities and supplies expenses. In addition, we recorded bad debt recovery of approximately \$0.7 million for the three months ended December 31, 2017. Excluding bad debt recovery, management expects SG&A expenses in Fiscal

2018 to be lower than in Fiscal 2017 primarily as a result of our continued initiatives to reduce operating expenses and achieve profitability.

Interest Expense Interest expense was \$0.2 million and \$0.1 million during the three months ended December 31, 2017 and 2016, respectively. As of December 31, 2017, we had total debt of \$11.0 million outstanding under the credit facility.

Nine Months Ended December 31, 2017 and 2016

The following table summarizes our revenue by geographic markets (amounts in millions):

	Nine Months Ended December 31,	
	2017	2016
	Revenue	Revenue
United States and Canada	\$ 34.3	\$ 20.1
Europe and Russia	10.7	18.4
Latin America	4.8	6.4
Asia and Australia	8.9	7.6
Middle East and Africa	3.1	1.7
Total	<u>\$ 61.8</u>	<u>\$ 54.2</u>

Revenue Revenue for the nine months ended December 31, 2017 increased \$7.6 million, or 14%, to \$61.8 million from \$54.2 million for the nine months ended December 31, 2016. The change in revenue for the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 included increases in revenue of \$14.2 million from the United States and Canadian markets, \$1.4 million from the Middle East and African markets and \$1.3 million from the Asian and Australian markets. These overall increases in revenue were offset by decreases in revenue of \$7.7 million from the European and Russian markets and \$1.6 million from the Latin American market. The increase in revenue in the United States and Canadian markets during the nine months ended December 31, 2017 compared to the same period the previous year was primarily because the natural resources vertical market continues to improve. The increase in revenue in the Middle East and African markets during the nine months ended December 31, 2017 compared to the same period in the previous year was primarily the result of our continued investment in key growth initiatives in those markets. Our revenue in the Middle East and African markets continues to be negatively impacted by the volatility of the global oil and gas markets and ongoing geopolitical tensions in these regions. The increase in revenue in the Asian and Australian markets was primarily because we shipped more C65 and C1000 Signature Series systems into these markets during the nine months ended December 31, 2017 compared to the same period last year. The decrease in revenue in the European and Russian markets during the nine months ended December 31, 2017 was primarily the result of ongoing geopolitical tensions in Russia and Ukraine and a strong U.S. dollar in certain markets making our products more expensive in such markets. The decrease in revenue in the Latin American market during the nine months ended December 31, 2017 compared to the same period the previous year was primarily the result of continuing softness related to changes in the electrical interconnect and utility tariffs in Mexico and reduced capital and operational spending, particularly in the upstream and midstream sectors of the oil and gas markets.

The following table summarizes our revenue (revenue amounts in millions):

	Nine Months Ended December 31,					
	2017			2016		
	Revenue	Megawatts	Units	Revenue	Megawatts	Units
Microturbine Product	<u>\$ 39.4</u>	37.7	195	<u>\$ 33.1</u>	33.0	189
Accessories and Parts	11.0			10.7		
Service	11.4			10.4		
Total Accessories, Parts and Service	<u>22.4</u>			<u>21.1</u>		
Total	<u>\$ 61.8</u>			<u>\$ 54.2</u>		

For the nine months ended December 31, 2017, revenue from microturbine products increased \$6.3 million, or 19%, to \$39.4 million from \$33.1 million for the nine months ended December 31, 2016. Megawatts shipped during the nine months ended December 31, 2017 increased 4.7 megawatts, or 14%, to 37.7 megawatts from 33.0 megawatts during

the nine months ended December 31, 2016. The increase in revenue and megawatts shipped was because of a favorable shift in product mix, as we sold a higher number of our C65 and C1000 Series systems during the nine months ended December 31, 2017 compared to the same period last year. The timing of shipments is subject to change based on several variables (including customer deposits, payments, availability of credit and delivery schedule changes), most of which are not within our control and can affect the timing of our revenue. Average revenue per megawatt shipped was approximately \$1.0 million during each of the nine months ended December 31, 2017 and 2016.

For the nine months ended December 31, 2017, revenue from our accessories and parts increased \$0.3 million, or 3%, to \$11.0 million from \$10.7 million for the nine months ended December 31, 2016. The increase in revenue from accessories and parts was primarily because of higher accessories shipments of our Organic Rankine Cycle (“ORC”) systems and heat recovery modules offset by lower parts shipments during nine months ended December 31, 2017 compared to the prior year. The decrease in parts shipments was primarily due to timing of certain parts sales promotions that occurred during the nine months ended December 31, 2016.

Service revenue for the nine months ended December 31, 2017 increased \$1.0 million, or 10%, to \$11.4 million from \$10.4 million for the nine months ended December 31, 2016. The increase in service revenue was primarily the result of our growing installed base and an increase in our energy efficiency customers purchasing our FPP service agreements.

For the nine months ended December 31, 2017, E-Finity and Horizon accounted for 19% and 10% of revenue, respectively. For the nine months ended December 31, 2016, BPC and Horizon, accounted for 12% and 10% of revenue, respectively.

Gross Margin Cost of goods sold includes direct material costs, production and service center labor and overhead, inventory charges and provision for estimated product warranty expenses. The gross margin was \$10.2 million, or 17% of revenue, for the nine months ended December 31, 2017 compared to a negative gross margin of \$0.3 million, or negative 1% of revenue, for the nine months ended December 31, 2016. The increase in gross margin of \$10.5 million, compared to the nine months ended December 31, 2016 was primarily because of lower expenses associated with warranty costs of \$5.9 million, a favorable shift in product mix of \$3.6 million and lower production and service center labor and overhead expense of \$1.3 million, offset by higher royalty expense of \$0.2 million and inventory charges of \$0.1 million. In addition to consolidating our manufacturing processes into our Van Nuys location, management continues to implement initiatives to improve gross margin in Fiscal 2018 by further reducing manufacturing overhead and fixed and direct material costs, and improving product performance as we work to achieve profitability.

The decrease in warranty expense of \$5.9 million during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 reflects decreases in reliability repair programs, warranty accommodations, warranty claims and the result of a benefit recognized in the same period last year related to the decrease in the number of units covered under warranty in the period. During the nine months ended December 31, 2016, we recorded a one-time non-cash warranty provision of approximately \$5.2 million to retrofit proactively select non-Signature Series C200 microturbines with the more robust new Signature Series generator components to improve product performance and reliability. The remaining non-cash warranty provision of approximately \$0.6 million for this reliability repair program was reversed during the three months ended December 31, 2017 because the program was completed. Management expects warranty expense in Fiscal 2018 to be lower than in Fiscal 2017 primarily because of a decrease in reliability repair programs.

Production and service center labor and overhead expense decreased \$1.3 million during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 primarily because of decreases of \$0.8 million in supplies expense, \$0.3 million in salaries expense and \$0.2 million in consulting expense. These decreases were primarily the result of our cost reduction program to lower labor and overhead expenses throughout the organization.

Royalty expense increased \$0.2 million during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 primarily as a result of higher sales of our C1000 Series systems which pay a higher royalty. We pay a predetermined fixed rate royalty for each microturbine system covered by our Development and License Agreement with Carrier.

Inventory charges increased \$0.1 million during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 primarily as the result of an increase in reserve for excess and obsolete inventory.

The following table summarizes our gross margin (in millions except percentages):

	Nine Months Ended December 31,	
	2017	2016
Gross Margin		
Product	\$ 2.5	\$ (7.0)
As a percentage of product revenue	6 %	(21)%
Accessories, parts and service	\$ 7.7	\$ 6.7
As a percentage of accessories, parts and service revenue	34 %	32 %
Total Gross Margin	<u>\$ 10.2</u>	<u>\$ (0.3)</u>
As a percentage of total revenue	17 %	(1)%

Product gross margin increased to 6% during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 primarily because of a decrease in warranty expense, a shift in product mix and lower production and service center labor and overhead expense in the current period. The decrease in warranty expense during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 reflects the reversal of the remaining non-cash warranty provision of approximately \$0.6 million during the nine months ended December 31, 2017 compared to a one-time non-cash warranty provision of approximately \$5.2 million was recorded during the nine months ended December 31, 2016. Accessories, parts and service gross margin increased to 34% during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016 primarily because of higher accessories shipments of our ORC systems and heat recovery modules, increase in energy efficiency customers purchasing our FPP service agreements and timing of FPP services performed.

R&D Expenses R&D expenses for the nine months ended December 31, 2017 decreased \$1.0 million, or 23%, to \$3.3 million from \$4.3 million in the nine months ended December 31, 2016. The overall decrease in R&D expenses of approximately \$1.1 million resulted from decreases in salaries expense of approximately \$0.7 million, supplies expense of \$0.2 million and facilities expense of \$0.1 million, which was a result of the reduction of the number of active research projects, because of our initiatives to reduce operating expenses and achieve profitability. Management expects R&D expenses in Fiscal 2018 to be lower than in Fiscal 2017 as a result of the continued cost reduction initiatives.

SG&A Expenses SG&A expenses for the nine months ended December 31, 2017 decreased \$1.8 million, or 12%, to \$13.8 million from \$15.6 million for the nine months ended December 31, 2016. The net decrease in SG&A expenses was comprised of decreases of approximately \$0.8 million in salaries expenses, \$0.7 million in professional services, including accounting expense, legal expense and bank fees, \$0.5 million in facility expense, \$0.2 million in marketing expense, \$0.1 million in supplies expense and \$0.1 million in consulting expense. These decreases were offset by lower bad debt recovery of \$0.7 million compared to the nine months ended December 31, 2016. Excluding bad debt recovery, management expects SG&A expenses in Fiscal 2018 to be lower than in Fiscal 2017 primarily as a result of our continued initiatives to reduce operating expenses and achieve profitability.

Interest Expense Interest expense was \$0.5 million and \$0.4 million during the nine months ended December 31, 2017 and 2016, respectively. As of December 31, 2017, we had total debt of \$11.0 million outstanding under the credit facility.

Liquidity and Capital Resources

Our cash requirements depend on many factors, including the execution of our plan. We expect to continue to devote substantial capital resources to running our business and implementing the strategic changes summarized herein. Our planned capital expenditures for the year ending March 31, 2018 include approximately \$1.0 million for plant and equipment costs related to manufacturing and operations. Management expects to spend more than planned primarily as

a result of consolidating our operations and offices into our Van Nuys, California location from our Chatsworth, California location. Our cash is held in depository institution accounts to provide liquidity for operations and for capital preservation.

Our cash, cash equivalents and restricted cash balances decreased \$3.2 million during the nine months ended December 31, 2017, compared to an increase of \$2.7 million during the nine months ended December 31, 2016. The decrease in cash, cash equivalents and restricted cash during the nine months ended December 31, 2017 compared to the increase in cash, cash equivalents and restricted cash during the same period last year was primarily because of higher cash generated from financing activities primarily from the issuance of common stock warrants and underwritten public offering during the nine months ended December 31, 2016 as described below.

Operating Activities During the nine months ended December 31, 2017, we used \$9.2 million in cash in our operating activities, which consisted of a net loss for the period of \$8.1 million and cash used for working capital of \$4.2 million, offset by non-cash adjustments (primarily change in warrant valuation, warranty provision, accounts receivable allowances, depreciation and amortization, stock based compensation and inventory provision) of \$3.1 million. During the nine months ended December 31, 2016, we used \$15.6 million in cash in our operating activities, which consisted of a net loss for the period of \$21.1 million and cash used for working capital of \$3.0 million, offset by non-cash adjustments of \$8.5 million.

The following is a summary of the significant sources (uses) of cash from operating activities (amounts in thousands):

	Nine Months Ended	
	December 31,	
	2017	2016
Net loss	\$ (8,083)	\$ (21,068)
Non-cash operating activities(1)	3,063	8,461
Changes in operating assets and liabilities:		
Accounts receivable	1,697	1,747
Inventories	(791)	763
Accounts payable and accrued expenses	(1,769)	(1,134)
Other changes in operating assets and liabilities	(3,285)	(4,376)
Net cash used in operating activities	<u>\$ (9,168)</u>	<u>\$ (15,607)</u>

(1) Represents change in warrant valuation, warranty provision, depreciation and amortization, fair value of warrants, stock-based compensation expense, inventory provision and accounts receivable allowances.

The change in non-cash operating activities during the nine months ended December 31, 2017 compared to the same period the previous year was primarily because of accounts receivable allowances offset by change in warrant valuation. The change in inventory was primarily the result of an increase in raw materials during the nine months ended December 31, 2017 compared to the same period the previous year. The change in accounts payable and accrued expenses was primarily the result of the level of inventory receipts and timing of payments made by us during the nine months ended December 31, 2017 compared to the same period the previous year. The change in other operating assets and liabilities was primarily because of a reduction in warranty payments for the proactive retrofit of certain non-Signature Series C200 microturbines during the nine months ended December 31, 2017 compared to the nine months ended December 31, 2016.

Investing Activities Net cash used in investing activities of \$1.4 million and \$0.4 million during the nine months ended December 31, 2017 and 2016, respectively, relates primarily to the acquisition of fixed assets and related leasehold improvements made to our Van Nuys location. During the three months ended December 31, 2017, we consolidated our operations and offices into our Van Nuys, California location from our Chatsworth, California location.

Financing Activities During the nine months ended December 31, 2017, we generated approximately \$7.4 million in financing activities compared to cash generated during the nine months ended December 31, 2016 of approximately \$18.7 million. The funds generated from financing activities during the nine months ended December 31, 2017 were primarily the result of proceeds from the October 2017 exercise of warrants and the at-the-market offering program described below, offset by net repayments under the credit facility and the repayment of notes payable and capital lease obligations. The funds generated from financing activities during the nine months ended December 31,

2016 were primarily the result of proceeds from the October 2016 offering of common stock and warrants and the April 2016 underwritten public offering described below, offset by net repayments under the credit facility and the repayments of notes payable and capital lease obligations.

On October 26, 2017, the Company entered into a Warrant Exercise Agreement (the “Exercise Agreement”) with a holder of the Series A warrants (the “Exercising Holder”), which Exercising Holder owns Series A warrants exercisable for 1,928,750 shares of Common Stock. Pursuant to the Exercise Agreement, the Exercising Holder and the Company agreed that the Exercising Holder would exercise its Series A warrants with respect to 1,928,750 shares of Common Stock underlying such Series A warrants for a reduced exercise price equal to \$0.90 per share. On October 27, 2017, the Company received net proceeds of approximately \$1.7 million from the exercise of the Series A warrants by the Exercising Holder. The Company did not pay any financial advisory fees in connection with the exercise of the Series A warrants by the Exercising Holder. In addition, the exercise resulted in the reduction of warrants to purchase common stock, par value \$0.001 per share, of the Company by approximately 19% and was not dilutive to existing stockholders of the Company calculated on a fully diluted basis for outstanding warrants.

On October 18, 2016, we entered into a securities purchase agreement with certain accredited investors, pursuant to which we agreed to sell 3,600,000 shares of common stock, pre-funded Series B warrants to purchase up to 2,700,000 shares of common stock (“the October 2016 Offering”), and Series A warrants to purchase up to 6,300,000 shares of common stock. Pursuant to a placement agent agreement, dated as of October 18, 2016, we engaged Oppenheimer & Co. Inc. as the lead placement agent for the offering and ROTH Capital Partners, LLC as co-placement agent for the offering. Each share of common stock was sold at a price of \$1.20. Each Series B warrant was issued with an exercise price of \$1.20 per share of common stock, \$1.19 of which was pre-funded at closing and \$0.01 of which is payable upon exercise. Each Series A warrant was issued with an initial exercise price of \$1.34 per share of common stock. These Series A warrants contain anti-dilution provisions that reduce the exercise price of the warrants if certain dilutive issuances occur. The anti-dilution provisions of the Series A warrants were approved by our stockholders at the 2017 annual meeting of stockholders held on August 31, 2017 and exercise price of the warrants was adjusted to \$0.60 per share. The value of this down round feature was measured using the Binomial valuation model and resulted in a loss of approximately \$0.1 million and \$0.7 million during the three and nine months ended December 31, 2017, respectively. The net proceeds to us from this offering, after deducting the placement agent fees and other estimated offering expenses, were approximately \$6.8 million. The offering closed on October 21, 2016.

On April 19, 2016, we entered into an underwriting agreement with Oppenheimer & Co. Inc. as the sole book-running manager, and Rodman & Renshaw, a unit of H.C. Wainwright & Co., LLC, as the co-manager, related to public offering of 2.7 million shares of our common stock and pre-funded Series B warrants to purchase up to 5.5 million shares of common stock, which were offered in lieu of common stock to those purchasers whose purchase of common stock in the offering otherwise would result in the purchaser beneficially owning more than 4.99% of our outstanding common stock following the completion of the offering (the “April 2016 Offering”). Also included in the offering were Series A warrants to purchase 4.1 million shares of common stock. Every two shares of common stock were sold with one Series A warrant to purchase one share of common stock at a collective negotiated price of \$3.50. Every two Series B warrants were sold with one Series A warrant to purchase one share of common stock at a collective negotiated price of \$3.48. The net proceeds to us from the sale of the common stock and warrants, after deducting fees and other offering expenses, were approximately \$13.1 million. The offering closed on April 22, 2016.

Effective August 28, 2015, we entered into a sales agreement with respect to an at-the-market offering program pursuant to which we may offer and sell, from time to time at its sole discretion, shares of our common stock, having an aggregate offering price of up to \$30.0 million. We will set the parameters for sales of the shares, including the number to be sold, the time period during which sales are requested to be made, any limitation on the number that may be sold in one trading day and any minimum price below which sales may not be made. During the three months ended December 31, 2017, we issued 3.4 million shares of our common stock under the at-the-market offering program and the net proceeds to us from the sale of our common stock were approximately \$2.6 million after deducting commissions paid of approximately \$0.1 million. During the nine months ended December 31, 2017, we issued 9.2 million shares of our common stock under the at-the-market offering program and the net proceeds to us from the sale of our common stock were approximately \$6.5 million after deducting commissions paid of approximately \$0.2 million. As of December 31, 2017, 16.5 million shares of our common stock were sold pursuant to the at-the-market offering program and the net proceeds to us from the sale of the common stock were approximately \$19.3 million after deducting commissions paid of approximately \$0.6 million. As of December 31, 2017, \$9.6 million remained available for issuance with respect to the

at-the-market offering program. These available proceeds are subject to Instruction I.B.6(a) to Form S-3 often referred to as the “Baby Shelf Rules.”

There were no stock options exercised during the nine months ended December 31, 2017 and 2016, respectively. Repurchases of shares of our common stock for employee taxes due on vesting of restricted stock units, net of employee stock purchases resulted in approximately \$22,000 and \$16,000 of net cash used during the nine months ended December 31, 2017 and 2016, respectively.

Former Credit Facility We maintained two Credit Agreements, with Wells Fargo, which provided us with a line of credit of up to \$20.0 million in the aggregate. As of March 31, 2017, \$11.5 million in borrowings were outstanding under the former credit facility. Upon closing with Bridge Bank, our existing credit facilities with Wells Fargo were paid off in full.

New Credit Facility On June 2, 2017, we entered into two secured credit facilities (the “Bridge Bank Credit Agreements”) with Western Alliance Bank through its Bridge Bank division (“Bridge Bank”), with credit support provided by the Export-Import Bank of the United States through its working capital guarantee program. Under the terms of the Bridge Bank Credit Agreements, we may borrow up to \$12.0 million on a revolving basis depending on, among other factors, the amount of our eligible inventory and accounts receivable. The Bridge Bank Credit Agreements are for a two-year period ending June 2, 2019. As of December 31, 2017, \$11.0 million in borrowings were outstanding under the new credit facility.

Total borrowings, letter of credit obligations and the then aggregate committed amount of cash management services under the Bridge Bank Credit Agreements may not exceed 85% of the sum of unrestricted cash and the amount of cash collateral held at Bridge Bank. As a condition of the Bridge Bank Credit Agreements, we have restricted \$5.0 million of cash equivalents as additional security for the credit facility. Borrowings under the Bridge Bank Credit Agreements will bear per annum interest at the prime rate plus 1.5 percent, subject to increase during the occurrence of an event of default. Obligations under the Bridge Bank Credit Agreements are secured by all of our assets, including intellectual property and general intangibles.

The Bridge Bank Credit Agreements include affirmative covenants as well as negative covenants that prohibit a variety of actions without Bridge Bank’s consent, including covenants that limit our ability to (a) incur or guarantee debt, (b) create liens, (c) enter into any merger, recapitalization or similar transaction or purchase all or substantially all of the assets or stock of another entity, or (d) sell, assign, transfer or otherwise dispose of our assets.

The financial covenants of the domestic credit agreement with Bridge Bank (the “Domestic Facility”), which is included in the Bridge Bank Credit Agreements, requires us not to exceed specified levels of losses relative to our financial model and the outstanding line of credit advances may not exceed 85% of the sum of unrestricted cash and the amount of cash collateral held at Bridge Bank. The Domestic Facility also defines an event of default to include a material adverse effect on our business. An event of default for this or any other reason, if not waived, could have a material adverse effect on us. As of December 31, 2017 we were in compliance with the covenants contained in the Bridge Bank Credit Agreements for Fiscal 2018.

Working Capital Cash used for working capital was \$4.2 million during the nine months ended December 31, 2017, an increase of \$1.2 million from the \$3.0 million cash used for working capital during the nine months ended December 31, 2016. We attribute the increase in our working capital requirements primarily because of the reduction to accounts payable as a result of payments we made during the nine months ended December 31, 2017.

Evaluation of Ability to Maintain Current Level of Operations In connection with preparing the consolidated financial statements for the nine months ended December 31, 2017, management evaluated whether there were conditions and events, considered in the aggregate, that raised substantial doubt about our ability to meet our obligations as they became due for the next twelve months from the date of issuance of our third quarter of Fiscal 2018 interim condensed consolidated financial statements. Management assessed that there were such conditions and events, including a history of recurring operating losses, negative cash flows from operating activities, the continued negative impact by the volatility of the global oil and gas markets, a strong U.S. dollar in certain markets making our products more expensive in such markets and ongoing geopolitical tensions in Russia, North Africa and Middle East. During the third quarter of Fiscal 2018, the Company’s working capital requirements were in-line with management’s expectations, which included the reduction in inventory as a result of a decrease in finished goods and the continued management of

the timing of payments of accounts payable. The Company incurred a net loss of \$0.3 million and used cash in operating activities of \$3.3 million for the third quarter of Fiscal 2018. The Company incurred a net loss of \$8.1 million and used cash in operating activities of \$9.2 million for nine months ended December 31, 2017. The Company also had capital expenditures related to the consolidation of its facilities in the third quarter of Fiscal 2018 which contributed to the cash used in investing activities. As of December 31, 2017, the Company had cash, cash equivalents and restricted cash of \$16.5 million, and outstanding borrowings under its credit facility of \$11.0 million.

Management evaluated these conditions in relation to our ability to meet our obligations as they become due. Our ability to continue current operations and to execute on management's plan is dependent on our ability to generate cash flows from operations. Management believes that we will continue to make progress on our path to profitability by continuing to lower our operating costs and to develop our geographical and vertical markets. We may seek to raise funds by selling additional securities (through the at-the-market offering or otherwise) to the public or to selected investors or by obtaining additional debt financing. There is no assurance that we will be able to obtain additional funds on commercially favorable terms or at all. If we raise additional funds by issuing additional equity or convertible debt securities, the fully diluted ownership percentages of existing stockholders will be reduced. In addition, any equity or debt securities that we would issue may have rights, preferences or privileges senior to those of the holders of our common stock.

Based on our current operating plan, management anticipates that, given current working capital levels, current financial projections, the ability to borrow under our credit facility with Bridge Bank, we will be able to meet our financial obligations as they become due over the next twelve months from the date of issuance of its third quarter of Fiscal 2018 financial statements.

Depending on the timing of our future sales and collection of related receivables, managing inventory costs and the timing of inventory purchases and deliveries required to fulfill the backlog, our future capital requirements may vary materially from those now planned. The amount of capital that we will need in the future will require us to achieve significantly increased sales volume which is dependent on many factors, including:

- the market acceptance of our products and services;
- our business, product and capital expenditure plans;
- capital improvements to new and existing facilities;
- our competitors' response to our products and services;
- our relationships with customers, distributors, dealers and project resellers; and
- our customers' ability to afford and/or finance our products.

Our accounts receivable balance, net of allowances, was \$16.1 million and \$17.0 million as of December 31, 2017 and March 31, 2017, respectively. Days sales outstanding in accounts receivable, ("DSO"), increased by 4 days to 64 days as of December 31, 2017 compared to 60 days as of December 31, 2016. The change in DSO was largely the result of higher revenue and level of collection of accounts receivable during the third quarter of Fiscal 2018 compared to the third quarter of Fiscal 2017. We recorded net bad debt recoveries of approximately \$0.8 million and \$1.4 million for the nine months ended December 31, 2017 and 2016, respectively. During Fiscal 2015, we recorded approximately \$7.1 million and \$2.6 million with respect to the accounts receivable allowances for BPC and EMI, respectively.

No assurances can be given that future bad debt expense will not increase above current operating levels. Increased bad debt expense or delays in collecting accounts receivable could have a material adverse effect on cash flows and results of operations. In addition, our ability to access the capital markets may be severely restricted or made very expensive at a time when we need, or would like, to do so, which could have a material adverse impact on our liquidity and financial resources. Certain industries in which our customers do business and certain geographic areas have been and could continue to be adversely affected by the previously referenced economic and geopolitical considerations.

On October 18, 2017, we announced that we had granted Turbine International, LLC (“TI”) and its affiliate, MTE Service, the sole distribution rights for Capstone products and services in the Russian oil and gas sector. In connection with the appointment of TI as our distributor in the Russian oil and gas sector, on October 13, 2017, we and TI entered into an Accounts Receivable Assignment Agreement (the “Accounts Receivable Agreement”) and Promissory Note (the “Promissory Note”). Pursuant to the terms of the Accounts Receivable Agreement, we assigned to TI its right, title and interest to receivables owed to us from BPC. As consideration for the assignment of the BPC receivable, TI agreed to pay us \$2.5 million in three payments by February 1, 2018. Under the terms of the Promissory Note, TI agreed to pay us \$3.8 million to be paid over a three-year period in 35 equal monthly installments starting in August 2018. On October 13, 2017, we and Hispania Petroleum, S.A. (the “Guarantor”), entered into a Guaranty Agreement (the “Guaranty Agreement”) whereby the Guarantor guarantees TI’s obligations under the Accounts Receivable Agreement and Promissory Note. MTE Service is a wholly owned subsidiary of Hispania Petroleum S.A. As of date of issuance of our third quarter of Fiscal 2018 interim condensed consolidated financial statements the February 1, 2018 payment of \$1.8 million has not yet been received. We are currently in discussions with TI regarding the timing of this payment.

New Accounting Pronouncements

In July 2017, the Financial Accounting Standards Board (“FASB”) issued a two-part Accounting Standards Update (“ASU”) No. 2017-11, I. Accounting for Certain Financial Instruments With Down Round Features and II. Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests With a Scope Exception (“ASU 2017-11”). ASU 2017-11 amends guidance in FASB ASC 260, Earnings Per Share, FASB ASC 480, Distinguishing Liabilities from Equity, and FASB ASC 815, Derivatives and Hedging. The amendments in Part I of ASU 2017-11 change the classification analysis of certain equity-linked financial instruments (or embedded features) with down round features. The amendments in Part II of ASU 2017-11 re-characterize the indefinite deferral of certain provisions of Topic 480 that now are presented as pending content in the Codification, to a scope exception. Those amendments do not have an accounting effect. ASU 2017-11 is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. We adopted ASU 2017-11 for the three months ended June 30, 2017, and retrospectively applied ASU 2017-11 as required. See Note 10—Fair Value Measurements for further discussion on changes as a result of the adoption of ASU 2017-11.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), (“ASU 2016-02”). The purpose of ASU 2016-02 is to provide financial statement users a better understanding of the amount, timing, and uncertainty of cash flows arising from leases. The adoption of ASU 2016-02 will result in the recognition of a right-of-use asset and a lease liability for most operating leases. New disclosure requirements include qualitative and quantitative information about the amounts recorded in the financial statements. In September 2017, the FASB issued ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842), which provides additional implementation guidance on the previously issued ASU 2016-02 Leases (Topic 842). ASU 2016-02 requires a lessee to recognize assets and liabilities on the balance sheet for leases with lease terms greater than 12 months. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018. ASU 2016-02 requires a modified retrospective transition by means of a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the guidance is effective with the option to elect certain practical expedients. Early adoption is permitted. We are currently evaluating the impact of ASU 2016-02 on our consolidated financial position and results of operations.

Revenue Recognition Related ASUs:

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”). ASU 2014-09 supersedes nearly all existing revenue recognition guidance under GAAP. The standard’s core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services.

In August 2015, the FASB issued FASB ASU No. 2015-14, Revenue from Contracts with Customers: Deferral of the Effective Date (“ASU 2014-09”), which deferred the effective date of ASU 2014-09 by one year. ASU 2014-09 is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, using one of two retrospective application methods. Early application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

In March 2016, the FASB issued FASB ASU No. 2016-08, Revenue from Contracts with Customers: Principal versus Agent Considerations (“ASU 2016-08”). ASU 2016-08 clarifies the implementation guidance on principal versus agent considerations.

In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing (“ASU 2016-10”). ASU 2016-10 clarifies the implementation guidance for identifying performance obligations and determining when to recognize revenue on licensing agreements for intellectual property.

In May 2016, the FASB issued ASU No. 2016-11, Revenue Recognition and Derivatives and Hedging: Rescission of SEC Guidance Because of ASU 2014-09 and ASU 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting (“ASU 2016-11”). ASU 2016-11 rescinds certain SEC staff comments previously made in regard to these ASU’s.

In May 2016, the FASB issued ASU No. 2016-12, Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients (“ASU 2016-12”) that provide guidance on assessing collectability, presentation of sales taxes, noncash consideration, and completed contracts and contract modifications at transition.

In December 2016, the FASB issued ASU 2016-20, Technical Corrections and Improvements to ASU 2014-09. The amendments in ASU 2014-09 affect narrow aspects of the guidance in ASU 2014-09, which is not yet effective. The amendments in ASU 2014-09 address loan guarantee fees, impairment testing of contract costs, provisions for losses on construction-type and production-type contracts, and various disclosures.

In September 2017, the FASB issued ASU 2017-13, “Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842): Amendments to SEC Paragraphs Pursuant to the Staff Announcement at the July 20, 2017 EITF Meeting and Rescission of Prior SEC Staff Announcements and Observer Comments”(“ASU 2017-13”) The amendments in ASU 2017-13 amends the early adoption date option for certain companies related to the adoption of ASU 2014-09 and ASU 2016-02.

We are evaluating our existing revenue recognition policies and the impact of ASU 2014-09, ASU 2015-14, ASU 2016-08, ASU 2016-10, ASU 2016-11, ASU 2016-12 and ASU 2016-20, if any, on our financial position and results of operations. The effective date and transition requirements for the amendments are the same as the effective date and transition requirements for ASU 2014-09. We will be required to adopt the revenue recognition standard in annual reporting periods beginning after December 15, 2017 (fiscal year ending March 31, 2019) and interim periods within those annual periods. ASU 2014-09 provides for either full retrospective adoption or a modified retrospective adoption by which it is applied only to the most current period presented. We have not yet determined which adoption method will be implemented at this time.

We are continuing to analyze the impact of the new standard on our revenue contracts, comparing our current accounting policies and practices to the requirements of the new standard. The new standard requires additional detailed disclosures regarding our contracts with customers, including disclosure of remaining unsatisfied performance obligations, in the first quarter of Fiscal 2019. We are also identifying and implementing changes to our business processes, systems and controls to support adoption of the new standard in Fiscal 2019. While we have not yet identified any material changes in the timing of revenue recognition for our various revenues streams, our evaluation is ongoing and not complete.

Off-Balance Sheet Arrangements

We did not have during the periods presented, and we do not currently have, any off balance sheet arrangements, as defined under SEC rules.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

No material changes have occurred in our quantitative and qualitative market risk disclosure as presented in our Annual Report on Form 10-K for Fiscal 2017.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective. The term “disclosure controls and procedures” means controls and other procedures of ours that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within required time periods. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

Federal Securities Class Action

Two putative securities class action complaints were filed against us and certain of our current and former officers in the United States District Court for the Central District of California under the following captions: David Kinney, etc. v. Capstone Turbine, et al., No. 2:15-CV-08914 on November 16, 2015 (the “Kinney Complaint”) and Kevin M. Grooms, etc. v. Capstone Turbine, et al., No. 2:15-CV-09155 on December 18, 2015 (the “Grooms Complaint”).

The putative class in the Kinney Complaint is comprised of all purchasers of our securities between November 7, 2013 and November 5, 2015. The Kinney Complaint alleges material misrepresentations and omissions in public statements regarding BPC and the likelihood that BPC would not be able to fulfill many legal and financial obligations to us. The Kinney Complaint also alleges that our financial statements were not appropriately adjusted in light of this situation and were not maintained in accordance with GAAP, and that we lacked adequate internal controls over accounting. The Kinney Complaint alleges that these public statements and accounting irregularities constituted violations by all named defendants of Section 10(b) of the Exchange Act, and Rule 10b-5 thereunder, as well as violations of Section 20(a) of the Exchange Act by the individual defendants. The Grooms Complaint makes allegations and claims that are substantially identical to those in the Kinney Complaint, and both complaints seek compensatory damages of an undisclosed amount. On January 16, 2016, several shareholders filed motions to consolidate the Kinney and Grooms actions and for appointment as lead plaintiff. On February 29, 2016, the Court granted the motions to consolidate, and appointed a lead plaintiff. On May 6, 2016, a Consolidated Amended Complaint with allegations and claims substantially identical to those of the Kinney Complaint was filed in the consolidated action. The putative class period in the Consolidated Amended Complaint is June 12, 2014 to November 5, 2015. Defendants filed a motion to dismiss the Consolidated Amended Complaint on June 17, 2016. On March 10, 2017, the Court issued an order granting Defendants’ motion to dismiss in its entirety with leave to amend. Plaintiffs filed an amended complaint on April 28, 2017. Defendants’ motion to dismiss was filed June 2, 2017. Plaintiffs filed their opposition to the motion to dismiss on July 7, 2017, and Defendants filed their reply in support of the motion to dismiss on July 28, 2017. The court vacated the hearing that was scheduled for August 18, 2017. We have not recorded any liability as of September 30, 2017 since any potential loss is not probable or reasonably estimable given the preliminary nature of the proceedings.

State Derivative Lawsuits — California

On February 18, 2016, a purported shareholder derivative action was filed in Los Angeles Superior Court in the State of California against us and certain of our current and former officers and directors under the following caption: *Stesiak v. Jamison, et al.*, No. BC610782. The lawsuit alleges that certain of our current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to us, but allowed us to make false and misleading statements regarding BPC and our financial condition. The complaint also alleges that the defendants failed to timely adjust our account receivables and backlog to reflect BPC's inability to pay us. The complaint asserts causes of action for breach of fiduciary duty and unjust enrichment. It demands damages for the amount of damage sustained by us as a result of the individual defendants' alleged breach of fiduciary duties and unjust enrichment, that we institute corporate governance reforms, and disgorgement from the individual defendants. On May 5, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. On May 10, 2016, the Court entered that proposed order. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed. A status conference is scheduled for March 7, 2018.

On June 8, 2016, a purported shareholder derivative action entitled *Velma Kilpatrick v. Simon, et al.*, No. BC623167, was filed in Los Angeles Superior Court in the State of California against us and certain of our current and former officers and directors. The complaint alleges that certain of our current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to us, but allowed us to make false and misleading statements regarding BPC and our financial condition. The complaint also alleges that the defendants failed to timely adjust our account receivables and backlog to reflect BPC's inability to pay us. The complaint asserts causes of action for breach of fiduciary duty. It demands damages for the amount of damage sustained by us as a result of the individual defendants' alleged breach of fiduciary duties, and that we institute corporate governance reforms. On August 23, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed. A status conference is scheduled for February 7, 2018.

On December 27, 2016, a purported shareholder derivative action entitled *Andre Rosowsky v. Jamison, et al.*, No. 30-2016-00894859-CU-MC-CJC was filed in Orange County Superior Court in the State of California against us and certain of our current and former officers and directors. The complaint alleges that certain of our current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to us, but allowed us to make false and misleading statements regarding BPC and our financial condition. The complaint also alleges that the defendants failed to timely adjust our account receivables and backlog to reflect BPC's inability to pay us. The complaint asserts causes of action for breach of fiduciary duty and unjust enrichment. It demands damages for the amount of damage sustained by us as a result of the individual defendants' alleged breach of fiduciary duties, that we institute corporate governance reforms, and restitution from the individual defendants. On April 14, 2017, the case was removed to the United States District Court for the Central District of California. On May 5, 2017, the plaintiff voluntarily dismissed his complaint without prejudice.

Federal Derivative Lawsuits

On March 7, 2016, a purported shareholder derivative action was filed in the United States District Court for the Central District of California against us and certain of our current and former officers and directors under the following caption: *Haber v. Jamison, et al.*, No. CV16-01569-DMG (RAOx). The lawsuit alleges that certain of our current and former officers and directors knew or should have known that BPC would be unable to fulfill its obligations to us, but allowed us to make false and misleading statements regarding BPC and our financial condition. The complaint asserts a cause of action for breach of fiduciary duty. It demands damages for the amount of damage sustained by us as a result of the individual defendants' alleged breach of fiduciary duties, and equitable relief, including that we institute appropriate corporate governance reforms. On May 11, 2016, the parties filed a stipulation and proposed order seeking to stay this action until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. On May 13, 2016, the Court entered that proposed order. Given that the federal securities class action was dismissed with leave to amend, this case is still stayed.

On July 12, 2016 and July 18, 2016, respectively, two additional purported shareholder derivative actions were filed in the United States District Court for the Central District of California against us and certain of our current and former officers and directors, under the caption *Tuttle v. Atkinson, et al.*, No. CV16-05127, and *Boll v. Jamison, et al.*, No. CV16-5282, respectively. The lawsuits allege that certain of our current and former officers and directors knew or

should have known that BPC would be unable to fulfill its obligations to us, but allowed us to make false and misleading statements regarding BPC and our financial condition. The Tuttle complaint asserts causes of action for breach of fiduciary duty, gross mismanagement, and unjust enrichment, and the Boll complaint asserts causes of action for breach of fiduciary duty, unjust enrichment, abuse of control, gross mismanagement, and waste of corporate assets. Both complaints demand damages sustained by us as a result of the individual defendants' alleged breaches of fiduciary duties, and equitable relief, including that we institute appropriate corporate governance reforms. The federal derivative actions have been stayed until such time as the defendants' motion(s) to dismiss the federal securities class action are either granted with prejudice or denied in whole or in part. Given that the federal securities class action was dismissed with leave to amend, these cases are still stayed.

Shareholder Demand

Following the dismissal without prejudice of his purported shareholder derivative action discussed above, former plaintiff in *Andre Rosowsky v. Jamison, et al.* sent us a letter dated July 7, 2017 (the "Shareholder Demand") demanding that the Board of Directors take action to remedy purported breaches of fiduciary duties allegedly related to the claims asserted in the above-discussed securities class action and derivative actions. We acknowledged the Shareholder Demand on July 25, 2017. Our Board of Directors has formed a committee to evaluate the Shareholder Demand.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in our Annual Report on Form 10-K for Fiscal 2017 except for the revision of the risk factor set forth below:

Our products involve a lengthy sales cycle, and we may not anticipate sales levels appropriately, which could impair our results of operations.

The sale of our products typically involves a significant commitment of capital by customers, which can result in the typical delays associated with large capital expenditures. For these and other reasons, the sales cycle associated with our products is typically lengthy and subject to a number of significant risks over which we have little or no control. We plan our production and inventory levels based on internal forecasts of customer demand, which is highly unpredictable and can fluctuate substantially. If sales in any period fall significantly below anticipated levels, our financial condition, results of operations and cash flow would suffer. If demand in any period increases well above anticipated levels, we may have difficulties in responding, incur greater costs to respond, or be unable to fulfill the demand in sufficient time to retain the order, which would negatively impact our operations. In addition, our operating expenses are based on anticipated sales levels, and a high percentage of our expenses are generally fixed in the short term. As a result of these factors, a small fluctuation in timing of sales can cause operating results to vary materially from period to period.

Net product orders for Fiscal 2017 were \$43.8 million and contributed to an ending backlog of \$113.0 million at March 31, 2017. The book-to-bill ratio was 1.1:1 for Fiscal 2017. Book-to-bill ratio is the ratio of new orders we received to units shipped and billed during a period. However, because our backlog represents only the estimated amount of future product revenue to be recognized under negotiated contracts as shipments convert backlog to recognized revenue for accounting purposes, we may not be able to fully realize the revenue value reported in our backlog, and our backlog may not be indicative of future revenues. A portion of our backlog is concentrated in the international oil and gas market which may impact the overall timing of shipments or the conversion of backlog to revenue. The timing of the backlog is based on the requirement date indicated by our customers. Based on historical experience, management expects that a significant portion of our backlog may not be shipped within the next 18 months. The timing of shipments is subject to change based on several variables (including customer deposits, payments, availability of credit and customer delivery schedule changes), most of which are not in our control and can affect the timing of our revenue. As a result, management believes the book-to-bill ratio demonstrates the current demand for our products in the given period.

During the second quarter of our fiscal year ended March 31, 2016, we removed approximately \$51.6 million, for 186 units, representing 63.8 megawatts, of backlog from BPC Engineering ("BPC"), one of our former Russian distributors. This removal aligned the backlog to our management's expectations based on the global macroeconomic environment during our fiscal year ended March 31, 2015, such as the volatility of the global oil and gas market, a strong U.S. dollar in certain markets making our products more expensive in such markets and on-going geopolitical tensions

involving Russia. In addition, we removed a portion of our TA100 backlog of approximately \$2.4 million, for 17 units representing 1.7 megawatts, from Calnetix Power Solutions, Inc. during the first quarter of our fiscal year ended March 31, 2016. This removal aligned our TA100 backlog with our management's decision to limit future production of TA100 systems.

During the second quarter of fiscal year ended March 31, 2018, we granted Turbine International, LLC and its affiliate, MTE Service, the sole distribution rights for Capstone products and services in the Russian oil and gas sector in exchange for approximately \$6.3 million in cash. As a result, the remaining backlog related to BPC may be negatively impacted. Backlog related to BPC comprises up to approximately 47% of our total backlog.

If we continue to fail to meet all applicable Nasdaq Capital Market requirements and Nasdaq determines to delist our common stock, the delisting could adversely affect the market liquidity of our common stock, impair the value of your investment and adversely affect our ability to raise needed funds.

Our common stock is listed on the Nasdaq Capital Market. In order to maintain that listing, we must satisfy minimum financial and other requirements. On December 12, 2016, we received a notice from the Listing Qualifications Department of the Nasdaq Stock Market ("Nasdaq") stating that, for 30 consecutive business days preceding the notice date, the closing bid price for our common stock had been below the minimum \$1.00 per share requirement for continued listing on the Nasdaq Capital Market as set forth in Nasdaq Listing Rule 5550(a)(2). On June 13, 2017 we were afforded an additional 180-day grace period to regain compliance with the minimum bid price requirement. On October 26, 2017 we regained compliance with the minimum bid price requirement.

On December 18, 2017, we received a notice from the Nasdaq stating that, for the last 30 consecutive business days, the closing bid price for our common stock had been below the minimum \$1.00 per share requirement for continued listing on the Nasdaq Capital Market as set forth in Nasdaq Listing Rule 5550(a)(2). In accordance with Nasdaq Listing Rule 5810(c)(3)(A), the Company has been provided 180 calendar days, or until June 18, 2018, to regain compliance with the minimum bid price requirement. In order to regain compliance, the bid price of our common stock must close at \$1.00 per share or more for a minimum of ten consecutive business days, at which time Nasdaq would provide written confirmation of our compliance. If we are not in compliance by June 18, 2018, we may be afforded a second 180 calendar day period to regain compliance. We will monitor the closing bid price of our common stock and will consider various possible options if it does not appear that we will return to compliance, including a reverse stock split which the stockholders had approved at the 2017 Annual Meeting and can be effected within twelve months of the annual meeting.

If we continue to fail to meet all applicable Nasdaq Capital Market requirements in the future and Nasdaq determines to delist our common stock, the delisting could adversely affect the market liquidity of our common stock and adversely affect our ability to obtain financing for the continuation of our operations. This delisting could also impair the value of your investment.

We may experience a delay in payment or may not collect on the Accounts Receivable Assignment Agreement or Promissory Note with Turbine International, LLC.

On October 18, 2017, we announced that we had granted Turbine International, LLC ("TI") and its affiliate, MTE Service, the sole distribution rights for Capstone products and services in the Russian oil and gas sector. In connection with the appointment of TI as our distributor in the Russian oil and gas sector, on October 13, 2017, we and TI entered into an Accounts Receivable Assignment Agreement (the "Accounts Receivable Agreement") and Promissory Note (the "Promissory Note"). Pursuant to the terms of the Accounts Receivable Agreement, we assigned to TI its right, title and interest to receivables owed to us from BPC. As consideration for the assignment of the BPC receivable, TI agreed to pay us \$2.5 million in three payments by February 1, 2018. Under the terms of the Promissory Note, TI agreed to pay us \$3.8 million to be paid over a three-year period in 35 equal monthly installments starting in August 2018. On October 13, 2017, we and Hispania Petroleum, S.A. (the "Guarantor"), entered into a Guaranty Agreement (the "Guaranty Agreement") whereby the Guarantor guarantees TI's obligations under the Accounts Receivable Agreement and Promissory Note. MTE Service is a wholly owned subsidiary of Hispania Petroleum S.A. As of date of issuance of our third quarter of Fiscal 2018 interim condensed consolidated financial statements the February 1, 2018 payment of \$1.8 million has not yet been received. We are currently in discussions with TI regarding the timing of this payment.

We may be affected by recent tax legislation.

On December 22, 2017, the President signed into law an extensive overhaul of the U.S. federal tax code called the Tax Cuts and Jobs Act, or the Tax Legislation. The Tax Legislation makes significant changes to the taxation of individuals and corporations, which could significantly affect our business, our operations, our financial condition, or the taxation of our stockholders and warrant holders.

CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER AND THE CHIEF FINANCIAL OFFICER

In connection with the quarterly report of Capstone Turbine Corporation (the "Company") on Form 10-Q for the quarter ended December 31, 2017, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Darren R. Jamison, as Chief Executive Officer of the Company, and Jayme L. Brooks, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. Sec. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

By: /s/ DARREN R. JAMISON
